OUR POLYVAGAL WORLD

How Safety and Trauma Change Us

STEPHEN W. PORGES and SETH PORGES

The creator of the Polyvagal Theory explains the principles in simple terms that are accessible to all.

"At last, a simple, eloquently straightforward, and comprehensive rendition of one of the most important recent advances in psychology and physiology, by its pioneer. Stephen Porges, ably assisted here by his son Seth, places his indispensable Polyvagal Theory into the context of our present-day frantic, post-pandemic, complicated lives and thereby guides us toward the safety on which our well-being, personal and social, depends. Essential reading; this book leaves me filled with appreciation." —**Gabor Maté, MD, CM**, author, *The Myth of Normal*

Our Polyvagal World definitively presents that Polyvagal Theory can be understandable to all and demonstrates how its practical principles are applicable to anyone looking to live their safest, healthiest, and happiest life. What emerges is a worldview filled with optimism and hope, and an understanding as to why our bodies sometimes act in ways our brains wish they didn't.

Filled with actionable advice and real-world examples, this book will change the way you think about your brain, body, and ability to stay calm in a world that feels increasingly overwhelming and stressful.

About the Authors | **Stephen W. Porges, PhD**, is the originator of the Polyvagal Theory and author of bestsellers *The Polyvagal Theory*, *The Pocket Guide to Polyvagal Theory*, *Polyvagal Safety*, and coeditor with Deb Dana of *Clinical Applications of The Polyvagal Theory* (see pages 8–10). **Seth Porges** codirected the documentary *Class Action Park* (HBO Max) and is a regular contributor to *Bloomberg News*, *Forbes*, *InStyle*, *Entrepreneur*, *New York* magazine, *Departures*, *Mashable*, and *Men's Journal*.

POLYVAGAL PROMPTS

Finding Connection and Joy Through Guided Exploration

DEB DANA and COURTNEY ROLFE

Discover the remarkable ways your nervous system works in service of your safety and well-being.

Polyvagal Theory, developed by researcher and scientist Dr. Stephen Porges and popularized by therapist Deb Dana, has impacted countless lives. It has changed the way therapists work with their clients and has provided a pathway toward healing for those who have experienced hardship or trauma.

In *Polyvagal Prompts*, Deb Dana and Courtney Rolfe invite readers to explore their nervous systems through Polyvagal Theory with engaging questions and exercises, which they can respond to directly in the pages of the book. Readers are guided in noticing their systems, listening with curiosity, and reflecting on what they learn. The book's prompts can be used as a daily practice or to explore specific topics at the reader's own pace, and are also ideal for helping clients track changes and reflect on their experiences.

No matter how readers decide to explore, *Polyvagal Prompts* offers an invaluable opportunity to begin the life-changing journey of befriending one's nervous system.

About the Authors | **Deb Dana, LCSW**, is a clinician, consultant, and the leading translator of Polyvagal Theory for both clinical and general readers. Her other books and resources include *Polyvagal Practices*, *Polyvagal Theory in Therapy*, *Clinical Applications of Polyvagal Theory*, *Polyvagal Exercises for Safety and Connection*, the *Polyvagal Flip Chart*, and the *Polyvagal Card Deck* (see pages 8–9).

Courtney Rolfe, MA, LCPC, is a therapist who utilizes a polyvagal-informed approach with her clients.

APPLIED POLYVAGAL THEORY IN YOGA

Therapeutic Practices for Emotional Health

ARIELLE SCHWARTZ

Treat trauma holistically with the combined applications of yoga and Polyvagal Theory.

This book focuses on the intersection of Polyvagal Theory, yoga, and psychotherapy by weaving together the wisdom tradition of yoga with neuroscience, attachment theory, somatic psychology, and traumatology. The application of Polyvagal Theory allows practitioners to compassionately support growth by enhancing the health of the autonomic nervous system, while therapeutic yoga allows one to attend to the interrelationships between mind, emotions, physiology, and behavior.

Topics include: Bridging yoga and psychotherapy; breathing and becoming; resourcing, rewiring, and resilience; mindful mobilization, and settling into stillness.

About
the
Author

Arielle Schwartz, PhD, is a licensed clinical psychologist, EMDR Therapy consultant, somatic psychotherapist, and certified yoga instructor with a private practice in Boulder, Colorado. She is the author of several books on trauma recovery, including *EMDR Therapy and Somatic Psychology* (see page 96).

ASSESSING TRAUMA-RELATED DISSOCIATION

With the Trauma and Dissociation Symptoms Interview (TADS-I)

SUZETTE BOON

Written for clinicians who want to learn how to diagnose dissociative disorders, as well as colleagues who do not perform the assessment, this book provides a wealth of information to assist clinicians in recognizing patients with dissociative symptoms and referring them for specialized diagnostic testing.

The complete TADS-I diagnostic tool is included in the book and available for download.

"This excellent book provides a highly accessible and comprehensive overview of the clusters of dissociative symptoms related to early childhood traumatic experiences . . . An invaluable contribution to improving clinical diagnosis and therefore increasing the number of patients referred to an appropriate treatment plan."

—**Manoëlle Hopchet**, clinical psychologist, psychotrauma therapist, and former president of the European Society for Trauma & Dissociation

BODY OF KNOWLEDGE CARD DECK

Sensorimotor Practices for Awareness, Regulation, and Expansion

PAT OGDEN

Our bodies hold a wealth of knowledge that, with the right tools, we can tap into at any time.

The somatic practices in this card deck experientially illuminate the innate and unique knowledge that resides in our bodies and will help you nurture a more deeply embodied connection with yourself, others, and the world.

The cards are divided into fifteen themes: ancestors and community, body connection, body sensation, boundaries, breath, containment, culture, five fundamental movements, grounding, mindfulness, movement, posture, the senses, positivity, and past and future.

DECOLONIZING THERAPY

Oppression, Historical Trauma, and Politicizing Your Practice

JENNIFER MULLAN

A call to action for therapists to politicize their practice through an emotional-decolonial lens.

An essential work that centers colonial and historical trauma in a framework for healing, *Decolonizing Therapy* illuminates that all therapy is—and always has been—inherently political. To better understand the mental health oppression and institutional violence that exists today, we must become familiar with the root of disembodiment from our histories, homelands, and healing practices. Only then will readers see how colonial, historical, and intergenerational legacies have always played a role in the treatment of mental health. This book is the emotional companion and guide to decolonization. It is an invitation for Eurocentrically-trained clinicians to acknowledge privileged and oppressed parts while relearning what we thought we knew.

“Jennifer Mullan offers a fiery provocation to all of us—especially those called to serve as therapists, practitioners, and healers. The call is to grasp at the root that which really harms us, those oppressive practices of our training that do more to dehumanize and disconnect than we’ve known. . . . What Mullan leaves us with, somehow, is everything, each other, and the beautiful and challenging project of creating decolonized spaces of healing and repair.” —**Prentis Hemphill**, The Embodiment Institute

HEALING RELATIONAL TRAUMA WORKBOOK

Dyadic Developmental Psychotherapy in Practice

DANIEL A. HUGHES and KIM S. GOLDING

A resource for practitioners implementing attachment-focused treatment for young people.

Dyadic Developmental Psychotherapy (DDP) is an attachment-focused treatment for children and adolescents who have experienced abuse and neglect and are now living in stable foster and adoptive families. Here, Daniel A. Hughes and Kim S. Golding provide a practical accompaniment to their highly successful DDP text, *Healing Relational Trauma with Attachment-Focused Interventions* (see page 35).

In this workbook, practitioners are invited to reflect on their experience of implementing the DDP model through discussion, examples, and reflection prompts. Readers are encouraged to consider the diversity of both practitioners and those receiving DDP interventions, and how each unique individual's identity can be embraced within the application of DDP interventions. DDP can be practiced as a therapy, a parenting approach, and as a practice approach for those working in healthcare, social care, or education, and this workbook is an invaluable resource for readers who fall into any one of these roles.

"Packed with scripts, case examples, and reflective exercises, this masterful resource revolutionizes DDP by embracing diverse cultural perspectives and intersectionality. Unprecedented in its integrative approach, this book is the ultimate compendium to fostering profound and healing connections for traumatized children." —**Leticia Gracia, MSW**, founding director, Institute of Childhood Trauma and Attachment

Topics include: Guiding principles from trauma; attachment, intersubjectivity, and interpersonal neurobiology; foundations of safe and healthy relationships; experience of dyadic developmental psychotherapy; nuts and bolts of dyadic developmental psychotherapy; complex therapeutic alliance With parents; parenting children with developmental trauma; interventions with specific populations of children and young people; parenting children with developmental trauma; training and supervising the DDP Way; and DDP research and evidence base.

About the Authors

Daniel A. Hughes, PhD, is a clinical psychologist and author who developed Dyadic Developmental Psychotherapy. He lives in Annville, Pennsylvania. See pages 20, 28, 35, 65, 77, and 87 for more books by Hughes, including the *Healing Relational Trauma with Attachment Focused Interventions* companion book (see page 35).

Kim S. Golding, PhD, is a clinical psychologist, author, and DDP consultant and trainer. She lives in Worcestershire, England. She is also coauthor with Daniel Hughes and Julie Hudson of *Healing Relational Trauma with Attachment Focused Interventions* (see page 35).

CHILD & ADOLESCENT MENTAL HEALTH, 3rd Edition

A Practical, All-in-One Guide

JESS P. SHATKIN

Everything clinicians need to know about the emotional well-being of kids—now updated and revised.

With the number and variety of mental health issues affecting kids on the rise, and as more clinicians and counselors are pushed to the front lines of defense, there is an acute need for a comprehensive, practical resource that guides professionals through the complexities of child and adolescent mental health. This book—now in its third edition—answers that call.

Fully revised and updated, *Child & Adolescent Mental Health* now includes chapters addressing mental health during a pandemic and gender dysphoria. Child and adolescent psychiatry expert Jess P. Shatkin distills three decades of clinical experience, research, and teaching into an effective guide that providers and trainees have kept within arm's reach for fifteen years.

"Providing an unrivaled composition of data—and probably the most up-to-date review of the research—[Shatkin] offers an indispensable guide to anyone who wants to better understand and help children." —*Psych Central*

Topics include: Prevention, mental health during a pandemic, attention-deficit/hyperactivity disorder, disruptive behavior disorders, learning disorders, communication disorders, intellectual development disorder, Autism spectrum disorders, Tourette's and tic disorders, anxiety disorders, trauma depression, bipolar disorder, suicide and self-injurious behavior, Schizophrenia and psychosis, substance use disorders, eating disorders, gender dysphoria, and sleep disorders.

About the Author

NARRATIVE PRACTICES AND EMOTIONS

40+ Ways to Support the Emergence of Flourishing Identities

MARIE-NATHALIE BEAUDOIN and GERALD MONK

Contemporary challenges and discoveries call for an update to narrative therapy practices.

Narrative therapy has the potential to help clients understand their challenges as separate from their fundamental selves, shifting the focus to their inner strengths when managing a problem. *Narrative Practices and Emotions* provides a fresh perspective for new and experienced practitioners alike on how to combine classic narrative therapy with the latest scholarship on the mind-body connection.

Authors Marie-Nathalie Beaudoin and Gerald Monk tap into cutting edge discoveries on mindfulness, interpersonal neurobiology, and positive psychology. Each chapter offers a wealth of clinical questions and embodied exercises, while “conversation maps”—which provide important guideposts to practitioners—are illustrated with engaging transcripts of therapeutic work. These compelling case studies elegantly demonstrate how skillful conversations can invigorate hope and support personal development. Readers will discover a wide variety of ways to assist clients of all ages in reengaging with a meaningful life and sustaining well-being.

Topics include: A biopsychosocial view of emotions, scaffolding preferred emotions, centered, decentered, and co-centered postures, neutralizing intense problematic emotions with ideas from interpersonal neurobiology, working with traumatic experiences, working with the five primary senses, the importance of collectivist practices, and harnessing bodily resources with specialized practices.

body rites

a holistic healing and embodiment workbook for Black survivors of sexual trauma

shena j. young

aishah shahidah simmons (foreword writer), shyma el sayed (illustrator)

Everyone knows someone who needs this book.

body rites as a holistic embodiment journey—anchored in the practice of decolonizing healing and reclaiming body sovereignty—reaches back into Indigenous roots. It centers remembering ancient and inner wisdom as a means of survival.

This book is the first of its kind: a resource of rituals divided into four healing journeys for Black women, femmes, and nonbinary survivors of sexual assault. The experiential workbook moves beyond prescriptive self-help models by providing a gentle guide and liaison to explore the impact of sexual trauma on the mind, body, heart, and spirit.

It is an invitation to heal holistically, drawing upon psychophysiology, lived body wisdom, trauma-informed embodiment practices, kinship and ancestral connections, and African spiritual practices. Most urgently, this book is a series of intimate conversations with your “self”—a remembrance that healing lives at the core of your intuition.

“*Body rites* is an incredibly grounding, sensitive, and informative guide to helping those who’ve experienced sexual assault feel reconnected to their bodies. dr. young does a masterful job of fostering a sense of safety and warmth as she walks beside readers on the journey of healing. The book breaks down scientific and psychological terms in accessible and relevant ways, and is a radical and needed departure from other texts in this space. Many will be able to see themselves and be helped by her offering.” —**Joy Harden Bradford, PhD**, licensed psychologist, founder of Therapy for Black Girls, and author of *Sisterhood Heals*

About
the
Author

shena j. young is a sacred being. she intends to live freely and authentically, to embody her sovereignty, to be cherished and respected by her ancestors, and to honor the ritual of calling community-beloveds back into their bodies as a freedom practice.

EMBODIED SELF AWAKENING

Somatic Practices for Trauma Healing and Spiritual Evolution

NITYDA GESSEL

“In *Embodied Self Awakening*, Nityda Gessel extends her invaluable knowledge to you, the reader. She offers actionable steps for understanding and processing trauma that appreciate the very important connection between the body and the mind. I highly recommend this book.” —**Gregory Scott Brown, MD**, psychiatrist, mental health writer, and author of *The Self-Healing Mind*

“Nityda Gessel has creatively and intelligently woven insights from Buddhist psychology, trauma theory, and Indigenous wisdom into an accessible guide. Anyone looking to deepen their spiritual path while engaging their psychological journey will find *Embodied Self Awakening* both practical and inspiring.” —**Kimberly Ann Johnson**, author of *Call of the Wild: How We Heal Trauma, Awaken Our Own Power, and Use it For Good*

Rejecting our suffering is not a sustainable solution because trauma is held in the body. In this book, Nityda Gessel invites readers on a journey toward lasting freedom, with insights and experiential practices that marry the wisdom of Buddhist psychology, yogic teachings, and Indigenous understanding with somatic psychotherapy and neuroscience. When we heal, our actions and attitudes are not hijacked by our nervous systems as easily. We begin to feel more comfortable in our bodies; more at peace, awake, and free. With Gessel's invitation, readers will learn to look out into the world, and see more than their own trauma reflected back.

THE NORTON SERIES on INTERPERSONAL NEUROBIOLOGY

IPNB BOOKS SOLD!

Welcome to the Norton Series on Interpersonal Neurobiology!

Interpersonal Neurobiology (IPNB) and this Series were born from a deep need to find common ground among various clinical disciplines so that we could work more collaboratively and have a core science-based curriculum that sheds light on some often unanswered and even unaddressed questions in the field of mental health.

Our Series begins with the **Polyvagal Bookshelf**, followed by three category groupings: **Scientific Fundamentals: Ways of Knowing**, **Therapeutic Framework: Ways of Being**, and **Clinical Applications: Ways of Doing**. Each of these books has themes that fit into each of the categories, not just the one it was placed in for organizational purpose. Our hope is that by classifying an initial theme of the book's message into one of these three areas, you'll be able to more easily select among the rich offerings and let the book then speak for itself about how to bring these ways of knowing, being, and doing into effective means to help others, and yourself, achieve mental health and well-being. INTRACONNECTED

MWe (Me + We) as the Integration of Self, Identity, and Belonging

DANIEL J. SIEGEL

BESTSELLER

*Exploring the nature of how our experience of what we call "self" emerges across the lifespan.*

"In this personally engaging and philosophically illuminating work, Dr. Dan Siegel takes his unique explorations of the human experience of self and mind to a yet deeper level. . . . Eloquently and expertly, he guides us back towards our true nature: intra- and inter-being with all others and all that is."

—Gabor Maté, MD, author of *The Myth of Normal: Trauma, Illness and Healing in a Toxic Culture*

"Dr. Siegel's work is a love letter to humanity—both a road map and an appeal for us to understand the strength, basis, and innate connection that we all have and must become aware of in order to move beyond survival mode and into thriving mode. . . . *IntraConnected* is a revelation, an awakening" —Shelly Tygielski, author of *Sit Down to Rise Up*, and founder of Pandemic of Love

"In an amazing dance of intellectual brilliance, heartfelt caring, and wise embrace, Dan Siegel invites us into the depth of his and our human story of development in order to examine, reflect, and melt the nature of the separate self. A new possibility of humanity arises when we authentically allow the possibility of intraconnectedness into our lives." —Thomas Hübl, PhD, founder, Academy of Inner Science, and author of *Healing Collective Trauma*

Consistent with the wisdom teachings of Indigenous cultures and contemplative practices from around the globe, science can now join in the message of opening our sense of who we are to address the major challenges of our time. In this book, Dr. Siegel shows how we are linked to one another as a relational We while being interconnected from the perspective of the individual part, the Me. The integration of Me plus We as a MWe cultivates the experience of being *intraconnected* with the system as a whole, enabling us to live with a more inclusive sense of self that promotes well-being throughout our individual and collective lives.

POLYVAGAL PRACTICES

Anchoring the Self in Safety

DEB DANA

The first book by acclaimed polyvagal writer Deb Dana to provide readers with at-home, do-it-yourself exercises.

"Deb Dana brilliantly crafts accessible and poignantly effective practices of self-exploration."

—**Stephen W. Porges, PhD**, creator of Polyvagal Theory, distinguished university scientist, Kinsey Institute, Indiana University

"Highly recommended for anyone wanting to understand, befriend, and learn to regulate their nervous system and thereby find inner peace." —**Gabor Maté, MD**, author of *The Myth of Normal: Trauma, Illness, and Healing in a Toxic Culture*

Polyvagal Practices explores how one's autonomic nervous system is both creator of and witness to one's lived experience. The strategies and exercises in this book guide the reader towards "befriending" their nervous system and achieving a state of autonomic regulation that brings a sense of safety, connection, and joy. This book is for anyone who wishes to build and strengthen their connection to the biological state of safety, and for anyone who has been wondering what benefits of the Polyvagal Theory can be brought home.

Topics include: a personal profile map of your autonomic nervous system; mapping your regulated and unregulated system; moving from protection to connection; from solitude to social; feeling and being safe enough to listen; noticing neuroception; recognizing autonomic invitations and warnings; changing the safety/danger equation; four pathways of connection; nourishing soundscapes; breathing into safety; developing a resource menu; and more!

POLYVAGAL FLIP CHART

Understanding the Science of Safety

DEB DANA

The flip chart offers therapists an easy, standardized way to support clients in understanding the role of the autonomic nervous system in their lives. Using a flip chart makes psycho-education an interactive experience. Therapists can feel confident in teaching their clients polyvagal theory by following the flip chart.

With a flip chart visible during sessions, the therapist can: remind clients of the ways the autonomic nervous system has been shaped and is active in their daily living experience; display a page corresponding to the present moment, thus anchoring that experience in the theory; keep a page of the hierarchy visible when working with a client's habitual response pattern.

POLYVAGAL EXERCISES FOR SAFETY AND CONNECTION

A Guide for Therapists to Help Their Clients

DEB DANA, Foreword by STEPHEN W. PORGES

BESTSELLER

"Deb Dana lucidly guides you to travel deep inside of yourself to become aware of how your internal surveillance system—the safety settings of your autonomic nervous system—is the foundation of the way we feel, act, and think." —Bessel A. van der Kolk, MD, President, Trauma Research Foundation, Professor of Psychiatry, Boston University School of Medicine

Deb Dana is the foremost translator of polyvagal theory into clinical practice. In her third book on this groundbreaking theory, she provides therapists with a grab-bag of polyvagal-informed exercises for their clients, to use both within and between sessions. These exercises offer readily understandable explanations of the ways the autonomic nervous system directs daily living.

POLYVAGAL SAFETY

Attachment, Communication, Self-Regulation

STEPHEN W. PORGES

BESTSELLER

Ever since publication of *The Polyvagal Theory* in 2011, demand for information about this innovative perspective has been constant. In this book, Stephen W. Porges brings together his most important writings since the publication of that seminal work. Polyvagal theory is about safety; it provides an understanding that feeling safe is dependent on autonomic states, and that our cognitive evaluations of risk in the environment play a secondary role to our visceral reactions to people and places. These ideas, and more, are outlined in chapters on therapeutic presence, group psychotherapy, yoga and music therapy, autism, trauma, date rape, medical trauma, and COVID-19.

THE POCKET GUIDE TO THE POLYVAGAL THEORY

STEPHEN W. PORGES

"Stephen Porges, PhD, has not only made one of the most profound and illuminating contributions to our understanding of the nervous system in the last 50 years—he's made one of the most useful ones. . . . This is ideal for clinicians of any kind, but also for anyone who wants to better understand their own nervous system, and that of those they care about." —**Norman Doidge, MD**, author, *The Brain That Changes Itself*, and *The Brain's Way of Healing*

This book presents Porges' perspective in a readily accessible way. It expands the meaning and clinical relevance of this groundbreaking theory.

POLYVAGAL THEORY AND THE DEVELOPING CHILD

Systems of Care for Strengthening Kids, Families, and Communities

MARILYN R. SANDERS and GEORGE S. THOMPSON, Foreword by STEPHEN W. PORGES

How sustained disruptions to children's safety have physical, behavioral, and mental health impacts that follow them into adulthood.

Pediatrician and neonatologist Marilyn R. Sanders and child psychiatrist George S. Thompson offer readers both a meditation on caregiving and a call to action for physicians, educators, and mental health providers. By attending to the lessons of polyvagal theory—that adult caregivers must be aware of children's unconscious processing of sensory information—the authors show how professionals can play a critical role in establishing a sense of safety even in the face of dangerous situations.

MARILYN R. SANDERS, MD, is a pediatrician/neonatologist and professor of pediatrics at Connecticut Children's Medical Center in Hartford, Connecticut. **GEORGE S. THOMPSON, MD**, is a child psychiatrist who assists healthcare organizations in building emotionally safe, curious, and collaborative cultures.

THE MAKING OF A THERAPIST

BESTSELLER

Veteran therapist and mental health writer Louis Cozolino's classic text contains all of the things he wished someone had told him during the first weeks and months of his clinical training. Now available in paperback, the book includes guidance about working with your clients, such as how to cope with silence, handle their direct questions, and get them to talk less and say more. It also focuses on the inner experience of becoming a therapist and ways of thinking and feeling while sitting across from clients. It speaks honestly about not having all the answers, and shuttling up and down between your head and your heart, and mind and body, as struggling clients sit before you. It balances the process of developing therapeutic skills while also taking an inner journey—to becoming the professional, and person, you hope to be. With a new introduction to the paperback edition, this book remains an essential clinical reference.

THE DEVELOPMENT OF A THERAPIST

Healing Others - Healing Self

Cozolino takes us inside the mind and heart of a seasoned therapist, carrying on the tradition of personal and professional writing begun in *The Making of a Therapist*. This book discusses some of the more abstract concepts and ways of interacting with clients such as relaxed curiosity, finding the secret ally, and discovering the deep narrative. Also addressed are clinical concepts such as related states of mind, the process of change, free-floating attention, and listening with the third ear.

More than just theoretical commentary, the book offers concrete clinical advice for the experienced therapist and brings a fresh perspective to some of the most current clinical challenges including the complexities of executive functioning; treating clients with internet addiction; and taking responsibility for your continued personal growth, clinical supervision, and education after leaving school.

These three Quick Reference Guides place the essentials of Interpersonal Neurobiology (IPNB)—the theory of interconnection between brain, mind, and relationships—at the practitioner's fingertips. Designed to be at the therapist's side for easy reference, each 8.5"×11" laminated, trifold card presents a facet of this important topic in six easy-to-follow panels. *Interpersonal Neurobiology Essentials* provides an overview of key terms and concepts as well as clinical applications of IPNB, while *Trauma Essentials* and *Attachment Essentials* delve into these two focus areas of interpersonal neurobiology. In these, readers will find diagnosis criteria and treatment modalities for various forms of trauma as well as an overview of attachment theory and the essential neuroscience concepts of attachment. Perfect as a brief refresher for the practitioner as well as a tool for their students and clients.

THE POCKET GUIDE TO NEUROSCIENCE FOR CLINICIANS

Louis Cozolino helps clinicians to broaden their thinking and deepen their clinical toolbox through an understanding of neuroscience, brain development, epigenetics, and the role of attachment in brain development and behavior. This book will give clinicians all they need to understand the social brain, the developing brain, the executive brain, consciousness, attachment, trauma, memory, and the latest information about clinical assessment. Key figures and terms of neuroscience, along with numerous case examples, bring the material to life.

"Written with concision, elegance and anecdotal verve, this book combines cutting-edge science and the experience-based insights of a master clinician. Lou Cozolino's guide to applied neuroscience will be a treasured resource for therapists, physicians, and counselors for a long time to come." —**Gabor Maté, MD**, author *In the Realm of Hungry Ghosts: Close Encounters with Addiction*

THE DEVELOPMENT OF THE UNCONSCIOUS MIND

"His authentic and original contributions... have contributed to refine and reshape our understanding of the mechanisms underpinning psychopathology and thus my clinical practice." —Dr. George Halasz, *ESTD Newsletter*

This book traces the evolution of the concept of the unconscious from an intangible, metapsychological abstraction to a psychoneurobiological function of a tangible brain. An integration of current findings in the neurobiological and developmental sciences offers a deeper understanding of the dynamic mechanisms of the unconscious. The relevance of this reformulation to clinical work is a central theme of *Right Brain Psychotherapy* (see below).

RIGHT BRAIN PSYCHOTHERAPY

An exploration into the adaptive functions of the emotional right brain, which describes not only affect and affect regulation *within* minds and brains, but also the communication and interactive regulation of affects *between* minds and brains. This book offers evidence that emotional interactions reflect right-brain-to-right-brain affective communication. Essential reading for readers trying to understand one-person psychology as well as two-person psychology (relationships, whether clinical or otherwise).

AFFECT REGULATION AND THE REPAIR OF THE SELF & AFFECT DYSREGULATION AND DISORDERS OF THE SELF

These books bring together Schore's integrative work on affect regulation and dysregulation. Considered together, they show both the breadth of his theoretical models and the practical import of his findings. The complex biopsychosocial model that emerges from Schore's research highlights the integrative character of the biological and the psychological realms in early development and over the course of the human lifespan.

REASSEMBLING MODELS OF REALITY

Theory and Clinical Practice

ALDRICH CHAN

Therapists must rely on their clients' reporting of experience in order to assess, treat, and offer help. Yet we all experience the world through various filters of one sort or another, and our experiences are transformed through several nonconscious processes before reaching our conscious awareness. Neuropsychologist Aldrich Chan examines how our experience of reality is assembled and shaped by biological, psychological, sociocultural, and existential processes. Each chapter explores processes within these domains that may act as "veils." By understanding the ways in which reality can be distorted, clinicians can more effectively help their clients reach their personal psychotherapeutic goals.

Aldrich Chan, PSYD, is a clinical and research neuropsychologist practicing in Miami, Florida, and an adjunct professor at Pepperdine University.

THE EMOTIONAL FOUNDATIONS OF PERSONALITY

A Neurobiological and Evolutionary Approach

KEN DAVIS and JAAK PANKSEPP

This book presents the wealth of scientific evidence that our personality emerges from evolved primary emotions shared by all mammals. These subcortically-generated emotions bias our actions, alter our perceptions, guide our learning, provide the basis for our thoughts and memories, and become regulated over the course of our life.

Jaak Panksepp, famously known for discovering laughter in rats and creating the field of affective neuroscience, died in April 2017. This book forms a part of his lasting legacy and impact on a wide range of scientific and humanistic disciplines. It will be essential reading for anyone trying to understand how we act in the world and the world's impact upon us.

ISBN: 978-0-393-71057-1 • 2018 • 352 pages • Hardcover • \$35.00

THE ARCHAEOLOGY OF MIND

Neuroevolutionary Origins of Human Emotions

JAAK PANKSEPP and LUCY BIVEN, Foreword by DANIEL J. SIEGEL

"Jaak Panksepp is the most important theorist of mental life that I have read since Freud. The impact of his scientific contributions will be felt for decades to come." —Mark Solms, Editor, *Freud's Complete Works*

This book presents an affective neuroscience approach—which takes into consideration basic mental processes, brain functions, and emotional behaviors that all mammals share—to locate the neural mechanisms of emotional expression. It reveals—for the first time—the deep neural sources of our values and basic emotional feelings.

AFFECT REGULATION THEORY

DANIEL HILL, Foreword by ALLAN N. SCHORE

"Essential reading for graduate students and clinicians." —Lewis Aron, PhD, Director, New York University Postdoctoral Program in Psychotherapy & Psychoanalysis

Drawing on cutting-edge understanding from the fields of attachment, developmental trauma, implicit processes, and neurobiology, this is the first book of its kind to translate the intricacies of affect regulation theory into a cogent clinical synthesis and useful guide for any practitioner.

FOUNDATIONAL CONCEPTS IN NEUROSCIENCE

A Brain-Mind Odyssey

DAVID E. PRESTI

Based on the author's popular UC Berkeley course, this book provides a complete overview of brain structure and function. Comprehensive enough to use as a text in an introductory course on neuroscience, but fundamental enough to be read by anyone interested in learning how the brain works, the chapters in the book are concise yet thorough, rigorous yet easy-to-follow and fun to read.

MIND-BRAIN-GENE

Toward Psychotherapy Integration

JOHN B. ARDEN

"John Arden has drawn together the latest research into all the areas relevant to helping people with mental health." —*Human Givens Journal*

Psychoneuroimmunology is a field that links the mind, brain, body, and genes and shows us how the fields of medicine and psychology are completely intertwined. This book explains the connections and offers readers an understanding of how the environment can impact gene expression, which, in turn, impacts behavior.

BORDERLINE BODIES

Affect Regulation Therapy for Personality Disorders

CLARA MUCCI

"[A] revolutionary way to understand how personality disorders develop, and importantly, that their symptomatology can be remedied. Drawing on psychoanalytic theory, it bridges epigenetics, attachment theory, and relationships—particularly the healing relationship that ensues between the clinician and the client." —*Psych Central*

People with personality disorders often attack their own bodies through eating disorders and other self-destructiveness. This book takes a wide-ranging approach to borderline personality disorders and argues that people cannot be treated effectively until the complex mind-body-brain connection is understood.

INFANT/CHILD MENTAL HEALTH, EARLY INTERVENTION, AND RELATIONSHIP-BASED THERAPIES

A Neurorelational Framework for Interdisciplinary Practice

CONNIE LILLAS and JANIECE TURNBULL

In response to the critical need for a more cohesive system of care for our youngest patients, this book presents a conceptual framework for interdisciplinary collaboration. Examining the issues of infant mental health and early intervention from a brain-based perspective—one that cuts across all domains—Lillas and Turnbull address the need for individual practitioners to incorporate the whole picture as they assess and intervene with each individual child and parent, and provide a global framework for team collaboration.

Includes a CD-ROM with supplemental worksheets, figures, and tables.

THERAPEUTIC FRAMEWORK: WAYS OF BEING

OUR ANXIOUS SELVES

Neuropsychological Processes and their Enduring Influence on Who We Are

EFRAT GINOT

There are no other emotions as central to our psychological and physical health as fear and anxiety

"Our Anxious Selves masterfully distills the latest research in psychology and neuroscience, making it accessible to a wide audience. **Ginot's book has deepened my understanding of the anxiety and trauma I see in my clients and has altered the ways we work together.** It has helped me to process and heal my own family dynamics. This book should be read by every practitioner in psychology's allied fields—coaches, chaplains, clergy, spiritual directors, and healers." —**Gretchen Martens**, Ontological Coach, Spiritual Companion, and Reiki Master

"In her inimitable, engaging style, Ginot combines neuroscientific research with clinical material, illustrating how, while fear-reactions and anxiety are inevitable parts of life, we can live our lives to the fullest despite anxiety's presence. With rates of anxiety having risen dramatically across the globe during the COVID-19 pandemic, this is a tremendously timely and valuable book for therapists, educators, and anyone who wishes to successfully and adaptively ease the grip of anxiety." —**Irit Felsen**, Professor, Columbia University and clinical psychologist, private practice

What has emerged from an advanced understanding of the fear system and of how integrated our brains, minds, and bodies are is the realization that none of us can fully escape the injurious effects of one of evolution's most remarkable legacies. We all are vulnerable to a quick fear system that is easily activated by a wide range of normative stresses and not only by traumata. But, as the chapters of Efrat Ginot's new book indicate, the more we understand our propensity for developing and anxious self-states, the more we can coexist with them without losing ourselves in them.

About the Author | **Efrat Ginot, PhD**, a graduate of the NYU Postdoctoral Program for Psychotherapy and Psychoanalysis, is a psychologist and a supervisor in private practice in NYC. Her book *The Neuropsychology of the Unconscious* (see page 21) received the 2016 Grady Award. She has lectured and conducted workshops both in the US and abroad. Dr. Ginot is also a visual artist.

Theory and Practice

JANET R. SHAPIRO and JEFFREY S. APPLIGATE, Foreword by LOUIS COZOLINO

"The case studies are especially useful for social work educators and bring to life the science they so clearly discuss." —Terri Combs-Orme, PhD, Urban Child Institute Endowed Professor, College of Social Work, University of Tennessee

This second edition explores the application of recent research in neuroscience to prevention and intervention in multiple systems, settings and areas of social work practice. The book focuses on new research in areas such as the neurobiology of stress, the impact of early adversity and toxic stress on brain development, early childhood and adolescent brain development.

NEUROBIOLOGY AND THE DEVELOPMENT OF HUMAN MORALITY

Evolution, Culture, and Wisdom

DARCIA NARVAEZ, Foreword by ALLAN N. SCHORE

Winner of the American Psychological Association's
2015 William James Book Award and Winner
of the 2017 Expanded Reason Award

"[F]ascinating and compelling . . . [A] must for any college or institutional library and a highly recommended read for practitioners interested in neuroscience and the wider implications of human behavior in society today." —*Contemporary Psychotherapy*

Integrating the latest scholarship in clinical sciences and positive psychology, Narvaez provides an evolutionary framework for early childhood experience grounded in developmental systems theory, encompassing not only genes but a wide array of environmental and epigenetic factors. In light of these findings, Narvaez proposes a developmentally informed ecological and ethical sensibility as a way to revise the ways we think about parenting and sociality.

HEALING THE TRAUMATIZED SELF

Consciousness, Neuroscience, Treatment

PAUL FREWEN and RUTH LANIUS, Forewords by DAVID SPIEGEL and BESSEL VAN DER KOLK

"This is a landmark book in the history of psychotraumatology. Frewen and Lanius have created a new intellectual blueprint for understanding dissociation. Their book is unique in providing a detailed integration of the latest neuroscientific findings with the experience of what it is like to be traumatized."
—Chris R. Brewin, Professor of Clinical Psychology, University College London

Paul Frewen and Ruth Lanius present a new model for parsing the symptoms of trauma-related disorders into non-dissociative distress and properly dissociative "trauma-related altered states of consciousness," or TRASC. Their four-dimensional model tracks disturbances in 1) time-memory, 2) thought, 3) body, and 4) emotion.

THE NEUROPSYCHOLOGY OF THE UNCONSCIOUS

Integrating Brain and Mind in Psychotherapy

EFRAT GINOT, Foreword by ALLAN N. SCHORE

"[A] persuasive argument for delving into the unconscious, so that clients can make enduring change. By citing recent research, developing cohesive theories, and providing exemplary cases, this book lights up the darkest recesses of the unconscious to improve our therapeutic perception. . . . [A] compelling update of modern psychodynamic psychotherapy. We recommend it to anyone interested in the unconscious, psychoanalysis, and interpersonal neurobiology." —*The Milton H. Erickson Foundation Newsletter*

ISBN: 978-0-393-70901-8 • 2015 • 336 pages • Hardcover • \$42.50

BRAIN-BASED PARENTING

The Neuroscience of Caregiving for Healthy Attachment

DANIEL A. HUGHES and JONATHAN BAYLIN, Foreword by DANIEL J. SIEGEL

"The authors . . . offer salient, real-world vignettes that will resonate with parents and clinicians alike. . . . [H]ighly recommended reading for anyone hoping to get a taste of the exciting new field of interpersonal biology and enrich their knowledge of parenting." —*Journal of Psychiatric Practice*

Renowned attachment specialist Daniel Hughes and clinical psychologist Jonathan Baylin reveal what happens neurochemically when caregiving skills are strong—leading to healthy attachment—and when they're impaired, potentially leading to a host of behavioral and emotional problems in kids. In doing so, they provide parents, and the family therapists and clinicians who may work with them, with a roadmap for a stronger and more meaningful parent-child connection.

NEUROBIOLOGY ESSENTIALS FOR CLINICIANS

What Every Therapist Needs to Know

ARLENE MONTGOMERY,
Foreword by ALLAN N. SCHORE

"A practical handbook that easily translates into clinical practice."
—*Journal of Analytical Psychology*

What is so unique about this book is that the bulk of the chapters are clinical dialogue, accompanied by neurobiological commentary. Thus, readers can see for themselves, through case examples, just how a "neurobiological outlook" can inform therapeutic understandings of what clients are doing and saying.

THE POCKET GUIDE TO SENSORIMOTOR PSYCHOTHERAPY IN CONTEXT

"[T]his book is filled with riveting case examples that illustrate the efficacy of Sensorimotor Psychotherapy. . . . I hope this will become required reading for every therapist and policy maker!" —**Bessel A. van der Kolk, MD**, Professor of Psychiatry, Boston University School of Medicine, President, Trauma Research Foundation, author of *The Body Keeps the Score*

A guide to this groundbreaking somatic-cognitive approach to PTSD and attachment disturbances treatment, Pat Ogden presents Sensorimotor Psychotherapy with an updated vision for her work that advocates for an anti-racist, anti-oppression lens throughout the book.

This book will inspire practitioners to develop a deeper sensitivity to the issues and legacy of oppression and marginalization as they impact the field of psychology, as well as present topics of trauma and early attachment injuries, dissociation, dysregulation, and mindfulness through a Sensorimotor Psychotherapy lens. Numerous composite cases with a variety of diverse clients bring the approach to life.

SENSORIMOTOR PSYCHOTHERAPY

Interventions for Trauma and Attachment

PAT OGDEN and JANINA FISHER

BESTSELLER

"Provides a wealth of clinical wisdom and knowledge of the body that can be easily integrated into any other psychotherapeutic framework." —*European Society of Trauma and Dissociation Newsletter*

The body's intelligence is largely an untapped resource in psychotherapy, and the story told by the "somatic narrative" is arguably more significant than the story told by words. Written for therapists and clients to explore together in therapy, this book is a companion to *Trauma and the Body*. Each chapter of this book is accompanied by a guide to help therapists apply the chapter's teachings in clinical practice and by worksheets to help clients integrate the material on a personal level.

"Filled with clinical insight, coherent theory, case illustrations, various data gathering forms, and a treatment plan, this book should increase the competence and confidence of any clinician who is wise enough to read it." —**Harville Hendrix, PhD** and **Helen LaKelly Hunt, PhD**, co-creators of Imago Relationship Therapy and authors of *Doing Imago Relationship Therapy in the Space-Between*

"This book lays out in an eminently readable and accessible way the basic steps of effective couple therapy. It is a great contribution to the field and will guide numerous therapists onto the path of successful intervention." —**Sue Johnson, EdD**, author of *Hold Me Tight* and *Love Sense*; Founding Director of The International Center for Excellence in Emotionally Focused Therapy (ICEEFT)

In *10 Principles for Doing Effective Couples Therapy*, two of the world's leading couple researchers and therapists give readers an inside tour of what goes on inside the consulting rooms of their practice. They have been doing couples work for decades and still find it challenging and full of learning experiences. This book distills the knowledge they've gained over their years of practice into ten principles at the core of good couples work. Each principle is illustrated with a clinically compiled case plus personal side-notes and storytelling.

THE SCIENCE OF COUPLES AND FAMILY THERAPY

Behind the Scenes at the "Love Lab"

JOHN M. GOTTMAN and JULIE SCHWARTZ GOTTMAN

"It integrates all their previous work, intriguingly, by endowing with new meaning the concept out of which family therapy originated: homeostasis. John has been able to transfer his charismatic speaking style—the wit and pizzazz—to the printed page as he and Julie recount the twists and turns of their discoveries." —**Daniel Wile**, author of *After the Honeymoon, Revised Edition*

"Drawing on a wealth of research imbued with powerful theoretical insights, John and Julie Gottman's book is an intellectual achievement **sure to affect profound changes in many couples' lives, and without fail, change the way we live, love, and create families.**" —*Psych Central*

In this highly conversational and readable book, John and Julie Gottman offer the fulfillment of the original general systems theory first presented by biologist Ludwig von Bertalanffy in 1968. The Gottmans present a new, viable general systems theory, with precise, measurable, and easy-to-understand concepts. From this new empirical theory, an effective couples and family therapy emerges. They describe their clear-cut technology for creating change and delineate the six parameters of change. This book finally creates a firm scientific edifice for couples and family therapy.

COMPLEX INTEGRATION OF MULTIPLE BRAIN SYSTEMS IN THERAPY

BEATRIZ SHELTON and ALBERT SHELTON

Integrating groundbreaking research on neuroplasticity, brain development, and therapeutic change, this book details a novel neurobiological and psychotherapeutic paradigm—and reveals how therapists can use this paradigm for more successful treatment. Clients arrive to therapy troubled by deeply ingrained neural circuits and emotional habits. The authors illustrate how integrating self-affirming, nonconscious emotional resources changes rigid, maladaptive neural circuits. This allows the emergence of more complex and flexible mental functioning and produces more successful psychotherapeutic outcomes.

TREATING TRAUMA-RELATED DISSOCIATION

A Practical, Integrative Approach

KATHY STEELE, SUZETTE BOON, and ONNO VAN DER HART

Winner of the 2011 International Society for the Study of Trauma and Dissociation (ISSTD) Pierre Janet Writing Award.

"[O]ne of the most informative, comprehensive books on the treatment of complex trauma and trauma-generated dissociation I have ever read . . . This is necessary reading for all clinicians not only for understanding and treating trauma-generated dissociation but also as a great text for therapy in general."

—Roger M. Solomon, PhD, Senior Faculty, EDMR Institute

From the authors of the best-selling patient-oriented manual *Coping with Trauma-Related Dissociation*, comes an overview of the neuropsychology of dissociation as a disorder of non-realization, with chapters on assessment, prognosis, case formulation, treatment planning, and treatment phases and goals, based on best practices. This comprehensive volume, born out of thousands of hours of treating patients with dissociative disorders, focuses not only on how to conceptualize and treat dissociation, but on how to be with patients who experience themselves as many instead of one. A must for all trauma therapists.

NEUROBIOLOGICALLY INFORMED TRAUMA THERAPY WITH CHILDREN AND ADOLESCENTS

Understanding Mechanisms of Change

LINDA CHAPMAN

This approach to treatment utilizes the integrative capacity of the brain to create a self, foster insight, and produce change. Treatment strategies are based on cutting-edge understanding of neurobiology, the development of the brain, and the storage and retrieval of traumatic memory. Case vignettes illustrate specific examples of the reactions of children, families, and teens to acute and repeated exposure to traumatic events. Also presented is the most recent knowledge of the role of the right hemisphere (RH) in development and therapy.

LOVE AND WAR IN INTIMATE RELATIONSHIPS

Connection, Disconnection, and Mutual Regulation in Couple Therapy

MARION F. SOLOMON and
STAN TATKIN, Foreword by
DANIEL J. SIEGEL

"Reading this book was a sheer pleasure, and I did not skip a word. It is an artful theoretical and clinical integration with no wasted words. . . In this innovative couple therapy, they have documented the healing power of couples learning to take care of each other and put to rest the myth of the healing capacity of the autonomous self. I recommend this instructive book to all therapists. . . I hope this project gets lots of deserved attention." —**Harville Hendrix, PhD**, author of *Getting the Love You Want*

UNDERSTANDING THE BRAIN

From Cells to Behavior to Cognition

JOHN E. DOWLING

"A perfect introduction for anyone who comes to the brain with little background in brain science and who wants to have a meaningful understanding of how the brain works." *—American Journal of Psychology*

In this up-to-date revision of his 1998 book *Creating Mind*, Dowling conveys the essence and vitality of the field of neuroscience—examining the progress we've made in understanding how brains work, and shedding light on discoveries having to do with aging, mental illness, and brain health. Beautifully illustrated and lucidly written, this introduction elegantly reveals the beauty of the organ that makes us uniquely human.

BRAIN BYTES

Quick Answers to Quirky Questions about the Brain

ERIC CHUDLER and LISE JOHNSON

Neuroscience educators Eric Chudler and Lise Johnson get right to it, asking and answering more than one hundred questions about the brain. Questions include: Does size matter (do humans have the largest brains)? Can foods make people smarter? Does surfing online kill brain cells? Why do we dream? Why can't I tickle myself? Why do cats like catnip? Why do we yawn and why are yawns contagious? What can I do to keep my brain healthy?

See page 68 for *Worried?* by Johnson and Chudler.

THE LITTLE BOOK OF NEUROSCIENCE HAIKU

ERIC H. CHUDLER

Chudler turns his talents towards poetry in this whimsical yet educational book of haiku poems about the brain. The poems are grouped into three themes: *Places* (such as the frontal lobe and the cerebellum); *Things* (like brain scanners and animals); and *People* (including Eric Kandel and other neuroscientists). Each poem is accompanied by an explanatory footnote, making the book useful and informative for those who wish to learn more about neuroscientific concepts in a fun, unique, and memorable way.

THE DAO OF NEUROSCIENCE

Combining Eastern and Western Principles for Optimal Therapeutic Change

C. ALEXANDER SIMPKINS and ANNELLEN M. SIMPKINS

By weaving together Eastern traditions (including Yoga, Buddhism, Zen, and Daoism) and Western science, new understandings previously not considered emerge. This book is an insightful introduction to these traditions which sheds new light on the relationship between the mind and the brain. As we learn the Dao of neuroscience, we come to understand the brain's most optimal ways of functioning and how to facilitate its natural processes toward health, happiness, and fulfillment.

ESSENTIAL PSYCHOPATHOLOGY CASEBOOK

A companion to Maxmen's classic text Essential Psychopathology & Its Treatment

MARK D. KILGUS and WILLIAM S. REA, Editors

Each chapter is consistently organized to answer these central questions concerning clinical presentation: functional impairment; DSM diagnosis (keyed to DSM-V); epidemiology; differential diagnosis; etiology and pathogenesis; natural course without treatment; evidence-based bio-psycho-socio-spiritual treatment options; clinical course with management and treatment; systems-based practice issues; and legal, ethical, and cultural challenges. Designed as a clinical companion to the text *Essential Psychopathology and Its Treatment*, this book's important lessons can also be learned by reading it as a stand-alone text.

Best-selling author **BABETTE ROTHSCILD, MSW, LCSW**, is the editor of the **8 Keys to Mental Health Series** (see pages 64-65), and a member of the International Society for Traumatic Stress Studies (ISTSS). She gives lectures and professional trainings around the world. Her books have been translated into 18 different languages.

HELP FOR THE HELPER

Preventing Compassion Fatigue and Vicarious Trauma in an Ever-Changing World, Updated + Expanded

"This book should be very useful to practicing psychotherapists, social workers, nurses, psychiatrists, and especially those in training for these fields. The variety of skill-building exercises offers help for many issues that arise during training and practice." —*Bulletin of the Menninger Clinic*

"Written with a lot of common sense, it is easy to read and will be helpful to all therapists, whether they work with trauma and disaster victims or not." —*International Review of Psychiatry*

"The book is written from a pragmatic, non-spiritual perspective and is a great reminder of the fact that we do need to look after ourselves, as well as giving us a variety of useful strategies to help survive the ups and downs of therapeutic life." —*The Fulcrum Text*

The world has changed significantly since the first edition of *Help for the Helper* was published in 2006. To address these unique challenges, this revised and expanded edition now includes guidance for helping clients while maintaining therapists' own safety and sanity in crisis situations, managing the usual stresses and challenges during normal times, and tips for dealing with trauma when that is not a therapist's specialty. Topics include the neurophysiology and regulation of arousal, self-care during shared community/world crises, maintaining balance and strength, countertransference, somatic empathy, mirroring and mimicry.

8 KEYS TO SAFE TRAUMA RECOVERY WORKBOOK

BABETTE ROTHSCILD and VANESSA BEAR

Exercises of healing and transformation for trauma survivors.

This workbook helps readers identify, assess, and celebrate the resources they already have as well as offering new strategies to add to their personal toolbox. The wealth of activities are developed from, and informed by, the authors' clinical experience and are supported by neuroscience, psychology, and somatic psychology. The variety of exercises within each of the eight keys differ in their approach, offering explorations of creativity, movement, mindful awareness, nature connection, visualization, and writing.

The workbook is both a useful stand-alone volume and a companion to the best-selling *8 Keys to Safe Trauma Recovery* (see below). In both books, the eight keys that are integral to safe trauma recovery are explored through various activities aimed at helping readers feel safe, stable, and in control of their mind, body, and life in the aftermath of trauma. While the original book focuses more on theory, this workbook brings the concepts to life with actionable, practical exercises.

THE 8 KEYS: **KEY 1:** Plotting Your Course with Mindfulness **KEY 2:** Begin With Your Epilogue **KEY 3:** Remembering Is Not Required **KEY 4:** Stop Flashbacks **KEY 5:** Reconcile Forgiveness and Shame **KEY 6:** Take Smaller Steps for Bigger Leaps **KEY 7:** Get Moving **KEY 8:** Make Lemonade

REVOLUTIONIZING TRAUMA TREATMENT

Stabilization, Safety, & Nervous System Balance

This paperback edition of Babette Rothschild's *The Body Remembers, Volume 2*, clarifies and simplifies autonomic nervous system (ANS) understanding and observation. It includes a full-color table that distinguishes six levels of arousal, which has proven to be an essential clinical tool, presenting a new and useful distinction between trauma-induced hypoarousal and the low arousal that is caused by lethargy or depression. With an authoritative yet personal voice, Rothschild's book is essential reading for anyone working with those who have experienced trauma. The full-color ANS table is also available separately as a laminated desk reference card.

RETHINKING TRAUMA TREATMENT

Attachment, Memory Reconsolidation, and Resilience

COURTNEY ARMSTRONG

Creating safety, hope, and secure attachment to transform traumatic memories

Merely talking about a traumatic event is not enough: the parts of the brain where traumatic, implicit memories are stored don't understand words. Secure attachment is needed to buffer the impact. This book guides clinicians to fill in the missing experience of secure attachment in the form of a trusting, attuned, therapeutic relationship. With this help, clients can heal.

See page 49 for Courtney Armstrong's *The Therapeutic "Aha!": 10 Strategies for Getting Your Clients Unstuck*.

TRAUMA AND DISSOCIATION-INFORMED PSYCHOTHERAPY

Relational Healing and the Therapeutic Connection

ELIZABETH HOWELL

A new model of therapeutic action, one that heals trauma and dissociation, is overtaking the mental health field. It is not just trauma, but the dissociation of the self, that causes emotional pain and difficulties in functioning. This book discusses how people are universally subject to trauma, what trauma is, and how to understand and work with normative and extreme dissociation. In this new model, the client and the practitioner are both traumatized and flawed human beings who affect each other in the mutual process that promotes the healing of the client—psychotherapy.

TRAUMA AND THE STRUGGLE TO OPEN UP

From Avoidance to Recovery and Growth

ROBERT T. MULLER

Winner, 2019 Written Media Award,
International Society for Study of
Trauma & Dissociation

"Every therapist interested in helping clients with developmental trauma should read this book. A jewel of clinical wisdom, it focuses not only the content of trauma, but on the relational process of being with highly traumatized clients, and how to understand and work with the many avoidance strategies to dealing with trauma that we encounter in therapy." —Kathy Steele, MN, Past President, International Society for the Study of Trauma & Dissociation

Offering candid, personal guidance, using rich case examples, Dr. Robert T. Muller provides the steps needed to build and maintain a strong therapist-client relationship—one that helps bring recovery and growth. With a host of practical tips and protocols, this book gives therapists a roadmap to effective trauma treatment.

HOW WE PRACTICE THERAPY NOW

CHANTÉ D. DELOACH

Essential approaches to clinical practice for today's out-of-office world.

"This volume uses a conversational tone, examples, and personal experiences to present technical aspects of virtual and teletherapy, making the content accessible to both novices and experts. **Every practitioner should have this book on their shelf.**" —Eric Holmes, Associate Program Chair, Director: Psychological Trauma Studies Specialization, Antioch University, Los Angeles

Psychotherapy is not confined to the office: it can be online, virtual, wellness-oriented, flexible, and in service of public wellness. COVID-19 has forever changed the landscape of psychotherapy in these ways, and in ways we have yet to discover. Practicing psychologist Chanté D. DeLoach invites readers to reflect on the state of psychotherapy and emerging potentialities forged through crisis. She presents key concepts of telemental health, concierge therapy, and other out-of-office approaches to psychological well-being. Important discussions of race, intersectionality, and justice in teletherapy round out the book. Readers will be invited to critically reflect on their own identities and comfort in integrating the challenging issues of race, power, and privilege in clinical work.

CHANTÉ D. DELOACH, PsyD, is professor of psychology at Santa Monica College. She maintains a boutique clinical and consulting practice in Los Angeles, California.

TABLETOP ROLE-PLAYING THERAPY

A Guide for the Clinician Game Master

MEGAN A. CONNELL

Across the globe, therapists are using Tabletop Role-Playing Games (TTRPG) such as Dungeons & Dragons as a part of their practice.

“Dr. Megan Connell has masterfully crafted one of the best books for anyone who wants to know about applied tabletop gaming. Her ability to easily explain the nuances and complexities into digestible nuggets is fantastic (and well-needed) for new and old Game Masters alike. If you play tabletop RPGs, you need to own this book.” —Dr. Anthony Bean, licensed clinical psychologist, executive director of Geek Therapeutics, and author of *Integrating Geek Culture Into Therapeutic Practice*

“Extremely well-organized, well-researched, and thorough, this book is a must-have for any therapist interested in using tabletop role-playing games in therapy. Whether you’re a D&D expert, or have never played it, this book is a brilliant guide to help you utilize these games in treatment.” —Janina Scarlet, PhD, author of *Superhero Therapy*

By examining research on gaming, flow, immersion, and role-play, readers will gain an understanding of the theoretical underpinnings that make TTRPGs such effective and powerful therapeutic tools and how they can skillfully and ethically use TTRPGs in their own practices. The book will also look at this history of TTRPGs, specifically focusing on issues of diversity and representation, to help providers understand some possible pitfalls that exist within the medium. Finally, the book utilizes an example group to walk through everything from conception, planning, running, documentation, and termination of the group.

Topics include: choosing a gaming system; planning your group; ethics; diversity; session zero and safety tools; goal setting; building therapeutic encounters; documentation; and a full dialogue from documentation session example.

Megan A. Connell, PsyD, ABPP, is a licensed psychologist and therapeutic dungeon master.

#METOO-INFORMED THERAPY

Counseling Approaches for Men, Women, and Couples

DAVID B. WEXLER and HOLLY B. SWEET

#MeToo-Informed Therapy guides therapists in finding effective ways to help men who offend, empowering women to find their voices, exploring ways for men to be allies, and helping couples whose relationships can be enhanced by understanding #MeToo issues. Traditional gender roles and how they may contribute to sexual misconduct are discussed. Importantly, the book also takes a look at how intersectional factors around race, sexual orientation, and socioeconomic status further complicates these questions.

DAVID B. WEXLER, PhD, is a clinical psychologist and executive director of the nonprofit Relationship Training Institute. See pages 41, 48, 65, and 81 for more books by David B. Wexler. **HOLLY B. SWEET, PhD**, is a counseling psychologist and cofounder of the Cambridge Center for Gender Relations.

EMERGING ADULTS IN THERAPY

How to Strengthen Your Clinical Competency

ZACHARY AARON KAHN and JULIANA MARTINEZ, Editors

“In this timely book, Juliana Martinez and Zachary Kahn have assembled a profoundly diverse group of voices in an astonishingly coherent fashion. . . . [E]ach essay boasts its own insights, but it is, ironically, their multitude of juxtapositions that reveal their commonalities. In responding to recent social experiences and movements—from COVID-19 to Black Lives Matter—these invaluable pages offer a guide that could transform the work of therapists and parents alike. Its theories and ideas plead to be applied in the real world.” —Andrew Solomon, PhD, Professor of Clinical Psychology, Columbia University, National Book Award-winning author of *The Noonday Demon* and *Far from the Tree*

“Emerging adulthood” (EA) describes a developmental period between adolescence and adulthood, typically spanning ages 18-29. It’s a rough time for most people—perhaps now more than ever. This book is written by various psychologists and psychiatrists (many of whom are on the younger side), with diverse backgrounds and specialties related to EA. Much of the focus of the book is on the psychological impacts of the Covid-19 pandemic and the reckoning on racial injustice.

THE WOUNDED HEALER

The Pain and Joy of Caregiving

OMAR REDA

"With the recent increase in burnout among healing professionals, Reda provides us with a timely and welcome book. His detailed recommendations for avoiding burnout are clear and practical. I particularly like his insistence on prioritizing self-care, as health care workers often feel that they have to put themselves last. The book will also help readers deal with their own traumas—within themselves, their families, and workplaces that have become toxic." —David M. Allen, MD, author of *Coping With Critical, Demanding, and Dysfunctional Patients*

Though rewarding, the act of caregiving is also physically exhausting and emotionally draining. Many care providers believe that their feelings do not matter, that they should ignore their pain, brush off their trauma, wipe away their tears, and just "suck it up." Here, trauma counselor Omar Reda calls upon other healers to break free from cycles of secrecy, toxic stress, and silent suffering so they can continue to empower and inspire those in their care.

Omar Reda, MD, is a board-certified psychiatrist, a Harvard-trained trauma expert, an author, and a family advocate—but, most importantly, a dreamer and strong believer in the potential of finding beauty in all human encounters.

EIGHT KEY BRAIN AREAS OF MENTAL HEALTH AND ILLNESS

JENNIFER SWEETON

"Sweeton distills neuroscience into engaging, comprehensible information for the everyday clinical psychologist, making it significantly easier to incorporate it into our therapeutic work. I've used this with my toughest trauma clients with measurable success." —Gricelda Fragoso, PsyD, Clinical Psychologist, Owner of Mind Body Soul Psychology

In this handbook, clinical psychologist and best-selling author Jennifer Sweeton details the eight main areas of the brain affected by mental illness, how brain changes show up in the therapy room as symptoms and behaviors, and the types of therapies and psychotherapeutic techniques research has shown can heal the brain. After reading this book, clinicians will feel confident and excited about their ability to take a client-centered, strategic, brain-based approach to treatment planning.

Dr. Jennifer Sweeton is a clinical psychologist, best-selling author, and internationally recognized expert on trauma, anxiety, and neuroscience. Based in Kansas City, Kansas, she has trained more than 15,000 clinicians in all fifty US states, and in over twenty countries.

THE PRACTITIONER'S GUIDE TO THE SCIENCE OF PSYCHOTHERAPY

RICHARD HILL and MATTHEW DAHLITZ, Foreword by JOHN B. ARDEN

"[A] goldmine of information for not only psychotherapists but also medical professionals. . . . Hopefully, this book will be compulsory reading for all aspiring mental health professionals." —Gunnel Minett, psychologist and author of *Exhale: An Overview of Breathwork*

"[Hill & Dahlitz] are excellent writers. . . . These two talented authors address the complexities of therapy and ways to use new research findings and methodologies to enhance clinical practice. I highly recommend it!" —Michael Yapko, author of *Process-Oriented Hypnosis*, SCEH's 2021 Arthur Shapiro Award Winner for best book on hypnosis

The 21st Century psychotherapist can no longer be constrained by specific schools of practice or limited reservoirs of knowledge. But this new "era of information" needs to be integrated and made manageable for every practitioner. This book helps therapists know more about this new knowledge and how to apply it effectively. From basic neuroscience to body-brain systems and genetic processes, here therapists learn how to become more "response-able" to their clients.

RICHARD HILL is Managing Editor of *The Science of Psychotherapy* magazine. He holds workshops around the world based on his book *Mirroring Hands*, co-authored with Ernest Rossi. **MATTHEW DAHLITZ** is an author, psychotherapist, and Editor-in-Chief of *The Science of Psychotherapy* magazine (which he founded as *The Neuropsychotherapist* in 2013).

RECOGNIZING AND TREATING HOARDING DISORDER

How Much Is Too Much?

CAROL MATHEWS

Pathological hoarding was first formally conceptualized as a syndrome separate from OCD in the early 1990s, yet it wasn't until 2013 that hoarding received formal psychiatric diagnostic criteria in the DSM. How can a mental health professional who sees clients in an office determine if hoarding is a factor in a client's life? Carol Mathews provides readers with the first-ever comprehensive clinical book on hoarding, covering every aspect of the disorder.

EMOTIONAL NEGLECT AND THE ADULT IN THERAPY

Lifelong Consequences to a Lack of Early Attunement

KATHRIN A. STAUFFER

People who have experienced emotional neglect in the first months and years of life suffer negative consequences into adulthood. As adult psychotherapy clients, they require long-term work and delicate emotional attunement as well as a profound understanding of the experiences that have shaped their inner worlds. This book provides therapists with an in-depth view of the subjective experience of such “ignored children” and a range of possible theoretical models to help understand key features of their psychological functioning.

DIFFERENT PATIENTS, DIFFERENT THERAPIES

Optimizing Treatment Using Differential Psychotherapeutics

DEBORAH L. CABANISS and Yael HOLOSHITZ

“[S]hould be read by all interested in psychotherapy education, program directors, psychotherapists, and clinicians who refer patients for psychotherapy.” —*Academic Psychiatry*

This book is a guide to choosing among the many psychotherapeutic options available to patients and therapists today. Cabaniss and Holoshitz outline over twenty different types of therapy, including psychodynamic psychotherapy, CBT, DBT, MI, ACT, EMDR, exposure therapy, family therapy, psychoanalysis; schema and many others. At the heart of the book are vignettes of typical clinical situations, accompanied by commentary about treatment choice from over thirty psychotherapy experts. Written in accessible, jargon-free language, this book is suitable for introductory classes on psychotherapy, as well as seasoned therapists, or someone considering psychotherapeutic treatment.

THE SCIENCE AND PRACTICE OF WELLNESS

Interventions for Happiness, Enthusiasm, Resilience, and Optimism (HERO)

RAKESH JAIN, SAUNDRA JAIN, Foreword by DILIP JESTE

"Drs. Saundra and Rakesh Jain have written an erudite, encyclopedic, thoughtful, and accessible book about wellness. Their empathy and humanity emanates and surrounds each chapter." —Roger S. McIntyre, MD, FRCPC, Professor of Psychiatry and Pharmacology, University of Toronto

Wellness-centric clinicians look to improve various traits known to be beneficial to patients—traits such as happiness, enthusiasm, resilience, and optimism (referred to as the HERO traits). All of these not only improve global mental wellness, but also offer resilience against stress, depression, and anxiety. Wellness-centric interventions augment both psychopharmacology and traditional psychotherapies, such as CBT. Rakesh and Saundra Jain offer advice on such beneficial practices as exercise, mindfulness, optimized nutrition, optimized sleep, enhanced socialization, and positive psychology enhancement.

DOING PSYCHOTHERAPY

A Trauma and Attachment-Informed Approach

ROBIN SHAPIRO

"[The] clearest, most thorough, most compassionate look inside the work of psychotherapy that I've ever encountered. This book is like a consult session with one of the best." —Laura S. Brown, PhD, ABPP, Independent Practice of Consultation and Forensic Psychology, Seattle WA

Seasoned clinical author Robin Shapiro teaches readers the ins and outs of a trauma-and attachment-informed approach that is not tied to any one model or method. This book teaches assessment, treatment plans, enhancing the therapeutic relationship, and ethics and boundary issues, all within general framework of attachment theory and trauma. Early-career therapists will refer to it for years to come, and veteran practitioners looking for a refresher (or introduction) to the latest in trauma and attachment work will find it especially useful.

Robin Shapiro, LICSW, is a psychotherapist and clinical consultant in Seattle, Washington. She is the author of *The Trauma Treatment Handbook* (page 35), *Easy Ego State Interventions* (page 48), and *EMDR Solutions I and II* (page 95).

BOWEN THEORY'S SECRETS

Revealing the Hidden Life of Families

MICHAEL E. KERR

"As with Bateson's fireside chats, Bowen's coaching of the first generation of family therapists resonated beyond his day, and Kerr is revealing what that meant to a generation that may not have heard of them." —*Metapsychology*

Murray Bowen (1931-1990) was the first to study the family in a live-in-setting and describe specific details about how families function as systems. His theories dominated family therapy for decades. This book, written by one of his closest collaborators, updates his still-radical theory with the latest approaches to understanding emotional development.

Topics include: Systems Thinking • Evolution and the Emotional System • Patterns of Emotional Functioning • Differentiation of Self • Emotional Regression • Emotional Objectivity • Emotional Programming • Chronic Anxiety • The Multigenerational Family Organism • Sibling Position • Emotional Cutoff • Societal Emotional Process • Key Ingredients in the Process of Differentiation • Unidisease: A Proposed New Concept in Bowen Theory

THE SELF-COMPASSION SKILLS WORKBOOK

A 14-Day Plan to Transform Your Relationship with Yourself

TIM DESMOND

"With its engaging discussions and powerful techniques, anyone who wants to know how to get to a point of more happiness and life satisfaction will find [*The Self-Compassion Skills Workbook*] both accessible and satisfyingly specific. Very highly recommended!" —*Midwest Book Review*

Cutting-edge research shows that self-compassion is not only a skill anyone can strengthen through practice but also one of the strongest predictors of mental health and wellness. The practices in this book have been specially formulated to target and fortify what neuroscientists call the "care circuit" of the brain.

Devoting thirty minutes a day for just fourteen days to these simple practices can have life-changing results.

This book also features downloadable audio recordings for on-the-go practice.

SELF-COMPASSION IN PSYCHOTHERAPY

Mindfulness-Based Practices for Healing and Transformation

TIM DESMOND, Foreword by RICHARD J. DAVIDSON

"[A] very practical guide for therapists on why and how to include working with their self-compassion, and that of their clients, in therapy. . . . I expect that this book will appeal to a wide range of therapists, including those who already use mindfulness in their practice." —*Private Practice*

"I heartily recommend it both for clinicians and also as a valuable tool for classroom use to facilitate discussions for any classes in clinical psychology." —*Metapsychology*

This logically written guide integrates cutting-edge neuroscience with mindfulness and traditional Buddhist practices to show mental health professionals how they can help clients develop a more loving, kind, and forgiving attitude toward themselves.

PROMOTING HEALTHY ATTACHMENTS

Hands-on Techniques to Use with Your Clients

DEBORAH D. GRAY

"Offers real-world, practical insights that not only enliven therapists' comprehension of this field but invite them to apply these ideas in ways that are inclusive and relevant." —Mary M. McGowan, Executive Director of the Association for Training on Trauma and Attachment in Children (ATTACH).

Attachment theory is all the rage in therapy these days. But what does a therapist do with all the theory? This book presents successful attachment-oriented interventions for clinicians to use with parents, children, and a variety of presenting issues from trauma to depression to anger.

LGBTQ CLIENTS IN THERAPY

Clinical Issues and Treatment Strategies

JOE KORT

"Calls upon all clinicians, gay or straight, to move past their ignorance, look deeper, and do better work. His book should be required reading for any clinician interested in expanding their consciousness." —*Psych Central*

A therapist who treats LGBTQ clients often must be more than "gay friendly." Gay, lesbian, bisexual, and transgender clients have specific needs that require their own knowledge base. This book offers up-to-date information for clinicians treating LGBTQ clients, including new chapters on transgender, sexually fluid, and gender non-conforming clients.

EASY EGO STATE INTERVENTIONS

Strategies for Working with Parts

ROBIN SHAPIRO

"[P]articularly useful for therapists who have patients with post-traumatic stress disorder (PTSD) or find that their patients seem untreatable. Ego state work serves as another tool in the box a therapist can use in tough situations, and Shapiro does a great job in making ego state work compelling and understandable both for the layman and the professional." —*Somatic Psychotherapy Today*

Most of us have different aspects, "parts," or "ego states" of ourselves, which manifest as particular moods, behaviors, and reactions depending on the demands of our external and internal environments. "Ego state therapy" refers to a powerful, flexible therapy that helps clients integrate and reconcile these distinct aspects of themselves. This book offers practical techniques that any therapist can incorporate in his or her practice to address garden-variety developmental issues like self-care challenges, grief, anxiety, and differentiation from families and peer groups, as well as to support clients across the dissociation spectrum, including those who suffer from complex trauma.

Contents: **Part I: Getting Started with Ego State Work** 1. Defining and Diagnosing Ego States 2. Foundational Intervention: Accessing Positive States 3. Foundational Intervention: Creating Safe Places and Internal Caregivers 4. Foundational Intervention: Working with Infant and Child States • **Part II: Problem-Specific Interventions** 5. Trauma 6. THE FEELING BRAIN

The Biology and Psychology of Emotions

ELIZABETH JOHNSTON and LEAH OLSON

"This book offers a comprehensive, detailed and referenced, synthetic and analytic insight into emotional experience and its physiological substrate. . . . [T]he complexity and history of neurosciences and biological theories of emotions are told in a very accessible way." —*Metapsychology*

Delving into the personal yet scholarly study of the neuroscience of emotions, authors Olson and Johnston consider William James' famous question, still unanswered, "What is an emotion?" The authors move from a consideration of basic emotions and the early brain areas that have been associated with them to the more complex social emotions and their involvement of higher brain areas, using myriad case examples to illustrate the essential concepts.

CHANGE

Principles of Problem Formation and Problem Resolution

PAUL WATZLAWICK, JOHN WEAKLAND, and RICHARD FISCH, Foreword by MILTON H. ERICKSON, Preface to the paperback edition by BILL O'HANLON

This classic book deals with the age-old questions of persistence and change. It asks how problems arise and are perpetuated in some instances, but in other instances are resolved. It examines how, paradoxically, common sense and logical approaches often fail, while seemingly "illogical" and "unreasonable" actions succeed in producing the desired change. The book incorporates ideas about human communication, marital and family therapy, and the therapeutic effects of paradoxes and of action-oriented techniques of problem resolution. It is an outgrowth of the authors' work at the Brief Therapy Center of the Mental Research Institute.

ISBN: 978-0-393-70706-3 • 2011 • 176 pages • Paperback • \$19.95

PRAGMATICS OF HUMAN COMMUNICATION

A Study of Interactional Patterns, Pathologies, and Paradoxes

PAUL WATZLAWICK, JANET BEAVIN BAVELAS, and DON D. JACKSON

One of the “best books ever about human communication,” this book has formed the foundation of much research into interpersonal communication. The authors identify simple properties or axioms of human communication and demonstrate how all communications are a function of their contexts. Topics covered in this wide-ranging book include: the origins of communication; the idea that all behavior is communication; metacommunication; the properties of an open system; the family as a system of communication; the nature of paradox in psychotherapy; existentialism and human communication.

FUNDAMENTALS OF PSYCHOANALYTIC TECHNIQUE

A Lacanian Approach for Practitioners

BRUCE FINK

Unlike any other writer on Lacan to date, Fink illustrates his Lacanian approach to listening, questioning, punctuating, and interpreting with dozens of actual clinical examples. He clearly outlines the fundamentals of working with dreams, daydreams, and fantasies, discussing the numerous anxiety dreams, nightmares, and fantasies told to him by his own patients. By examining transference and countertransference in detail through the use of clinical vignettes, Fink lays out the major differences between mainstream psychoanalytic practice and Lacanian practice. Designed for a wide range of practitioners and requiring no previous knowledge of Lacan's work, this primer is accessible to therapists of many different persuasions.

One beauty of the book is that chapters can be referred to as an encyclopedic reference or read serially. . . . Dr. Stauffer's writing style is fluid, informal, and often funny.” —*Yoga Therapy Today*

Beginning with a discussion of the basic building blocks of the body, cells and molecules, Stauffer works through the body system by system, showing through clinical case examples that an understanding of each system can greatly enhance the art of psychotherapy.

ASSESSING ADULT ATTACHMENT

A Dynamic-Maturational Approach to Discourse Analysis

PATRICIA MCKINSEY CRITTENDEN and ANDREA LANDINI

This book describes a method for identifying the psychological and interpersonal self-protective attachment strategies of adults by applying discourse analysis to semi-structured interviews. Analyzing methods such as the Adult Attachment Interview and the Parents Interview, Crittenden and Landini present the Dynamic-Maturational Model of Attachment and Adaptation. Whether used as a guide to treatment formulation or a basis for gathering empirical data, *Assessing Adult Attachment* is a must for clinicians and researchers alike.

NEURO-PHILOSOPHY AND THE HEALTHY MIND

Learning from the Unwell Brain

GEORG NORTHOFF

Georg Northoff investigates consciousness through its absence in vegetative states and examines instances of distorted self-recognition in people with psychiatric disorders like schizophrenia, in order to understand how the experience of “self” is established in a stable brain. The result is a groundbreaking, integrative approach to understanding the self, consciousness, and what it means to be mentally healthy.

ADULT CHILDREN OF PARENTAL ALIENATION SYNDROME

Breaking the Ties that Bind

AMY J. L. BAKER

"Dr. Baker . . . has put PAS on the map as a significant form of emotional abuse afflicting adults long after they leave their childhood years behind. This is a book worth reading, assigning to students, and keeping as a reference." —S. Richard Sauber, PhD, coauthor of *International Handbook of Parental Alienation Syndrome*

"[W]ill become a classic . . . it is a milestone in the field." —Jayne A. Major, PhD, Stop Parental Alienation of Children (SPAC)

Parental alienation syndrome (PAS) occurs when one parent, often in response to divorce or separation, successfully manipulates a child into turning against the other parent. In this groundbreaking book, Baker describes the long-term impact of PAS, and offers therapists and consumers practical advice for treating it.

MEN IN THERAPY

New Approaches for Effective Treatment

DAVID B. WEXLER

"A wonderful contribution to both the study of men's issues and the larger mental health field . . . an accessible text for both novice and seasoned professionals." —*The Family Journal*

Therapists are offered a number of methods for countering men's general reluctance to open up emotionally or fully engage in therapy. Individual chapters are devoted to the treatment of men in relationships, men suffering from depression, fathers, men who abuse women, and men of color. In each case, Wexler provides an informative overview of the issues unique to each group, sound advice, and commonsense methods for treating each of these groups effectively, nonjudgmentally, and professionally.

POSITIVE AGING

A Guide for Mental Health Professionals and Consumers

ROBERT D. HILL

"Any in the mental health industry will find it useful and inspiring. . . . Lay readers will find this holds much hope for an aging population." —*California Bookwatch*

By combining a novel approach to human aging in the contemporary world with specific suggestions and ideas to optimize that process, this book promises to help all of us cope with the vicissitudes of growing older to continue to get the most out of living.

ISBN: 978-0-393-70453-2 • 2006 • 256 pages • Hardcover • \$27.95

SEVEN STRATEGIES FOR POSITIVE AGING

ROBERT D. HILL

A practical companion to Robert Hill's *Positive Aging*, this book explains how anyone can adopt and develop positive aging skills.

Readers will learn how to apply "meaning-centered" techniques of belonging, altruism, gratitude, and forgiveness in his or her own life, in order to enhance emotional health. These techniques are organized into seven distinct chapters: Learning, Meaning, Wisdom, Belonging, Helping, Gratitude, and Forgiveness.

ISBN: 978-0-393-70523-2 • 2008 • 288 pages • Paperback • \$19.95

CHARACTER STYLES

STEPHEN M. JOHNSON

Johnson shows how basic life issues underlie the severe pathology of personality disorder, the nagging symptoms of neurosis, and the more functional coping and adaptation of the character styles. Johnson's dimensional model captures the complexity of the human personality while allowing for variability not seen in categorical systems such as DSM-IV. His descriptive names of the character styles not only link childhood experiences to later personality and psychopathology, but also put flesh and bones on psychiatric diagnosis.

SANDPLAY THERAPY

A Step-by-Step Manual for Psychotherapists of Diverse Orientations

BARBARA LABOVITZ BOIK and E. ANNA GOODWIN

Sandplay allows clients to use nonverbal communication to express their internal and external worlds. The authors illustrate the process with numerous sandplay experiences with clients. They also discuss clients for whom sandplay is contraindicated and some problems that might arise. To encourage the growth of the therapist, they include instructions on personal sandplay work. For therapists interested in exploring the ways that sandplay facilitates growth and healing, this practical handbook will be an invaluable resource.

OUT OF THE BLUE

Six Non-Medication Ways to Relieve Depression

BILL O'HANLON

"Well, O'Hanlon has done it again. . . . His genius is to make something difficult, such as treating depression, look and become effortless. . . . I love this book and, of course, recommend it. I will prompt all my students and anyone who works with depressed people to read it carefully." —*The Milton H. Erickson Foundation Newsletter*

Psychotherapist and internationally recognized expert Bill O'Hanlon gives therapists and their clients a set of essential strategies for getting "unstuck" from patterns of depression. Antidepressant medication doesn't help everyone, and often offers only partial relief. This book introduces a new, medication-free approach to managing one of the most commonly encountered problems in psychotherapy, providing simple cognitive solutions for mastering depression's thorniest symptoms.

RACIAL TRAUMA

Clinical Strategies and Techniques for Healing Invisible Wounds

KENNETH V. HARDY

"Dr. Hardy's *Racial Trauma* is a long overdue and deeply important guide to an essential topic, and to the effects of racialized trauma on our individual bodyminds, our relationships, our communities, and our collective consciousness. Every—and I mean every—clinician needs to read, reflect on, and make use of this book." —Resmaa Menakem, MSW, LICSW, SEP, author of *My Grandmother's Hands*, *The Quaking of America*, and *Monsters in Love*

This book provides a unique and comprehensive examination of racial trauma, described by author Kenneth V. Hardy as a life-altering and debilitating emotional, psychological, and behavioral condition that affects countless People of Color over multiple generations. Racially sensitive trauma-informed interventions and strategies that centralize race and racial oppression in every facet of the therapeutic process and relationship are meticulously highlighted, making this a must-read resource for all practicing and aspiring clinicians.

Topics include: the dynamics of oppression and the roots of racial trauma; the seven invisible wounds of trauma, including internalized devaluation, assaulted sense of self, learned voicelessness, psychological homelessness, and rage; the process of therapy and racially sensitive, trauma-informed therapeutic principles.

THE ENDURING, INVISIBLE, AND UBIQUITOUS CENTRALITY OF WHITENESS

Implications for Clinical Practice and Beyond

KENNETH V. HARDY, Editor

A comprehensive collection of writers from the field of mental health and activism on the topic of whiteness.

"Whiteness is the socio-political default. To disrupt whiteness, it must be exposed. This collection, curated by visionary Dr. Ken Hardy, brilliantly and accessibly takes up this weighty task. This is a revelatory and essential new work, clear-eyed and instructive, yet also deeply personal and eloquent. Oh, that it may be required reading for anyone in human services!" —Robin DiAngelo, PhD, author of *White Fragility* and *Nice Racism*

Whiteness is a pervasive ideology that is rarely overtly identified or examined despite its profound effects on race relationships in therapy and beyond. Being intentional about naming, deconstructing, and dismantling whiteness is a precursor to responding effectively to the racial reckoning of our society and improving race relationships, addressing systemic bias, and moving towards the creation of a more racially just world. Contributors to the volume are from all different backgrounds and trainings.

Topics include: Reflections on the Centrality of Whiteness • Whiteness and Issues of Identity and Intersectionality • Cross-Racial Encounters and Relationships • Whiteness and White Spaces • Anti-Racism and On Becoming White Anti-Racists • Strategies for Deconstructing, Decentering, Dismantling Whiteness in Clinical Practice and Beyond

UNRULY THERAPEUTIC

Black Feminist Writings and Practices in Living Room

FOLUKE TAYLOR

"Genuinely refreshing and liberating. As you read, what emerges is a sense of adventure, a sense of soul connection, and a deep appreciation for other ways of knowing." —Eugene Ellis, founder and director of the Black, African, and Asian Therapy Network

Therapist and writer Foluke Taylor explores how centering black feminisms in therapeutic scholarship allows for greater space—for wandering, for wondering, and for deepening narratives—in every therapeutic relationship. Part thesis, part memoir, and part poetry, this book offers unruly companionship to other therapeutic texts. Beginning with the book's poetic structuring, Taylor rejects the need for a streamlined solution and invites the reader instead to take a different path through her crucial research—one that is nonlinear, and celebratory of the richer, fuller narratives allowed for by black feminisms.

8 KEYS TO RECOVERY FROM AN EATING DISORDER

Effective Strategies from Therapeutic Practice and Personal Experience

CAROLYN COSTIN and GWEN SCHUBERT GRABB, Foreword by BABETTE ROTHCHILD

Interweaving personal narrative with the perspective of their own therapist-client relationship, the authors bring an unparalleled depth of awareness into just what it takes to successfully beat this challenging and seemingly intractable clinical issue. With great compassion and clinical expertise, Costin and Grabb walk readers through the ins and outs of the recovery process, describing what therapy entails, clarifying the common associated emotions such as fear, guilt, and shame, and, most of all, providing motivation to seek help if you have been discouraged, resistant, or afraid.

EMBODIMENT AND THE TREATMENT OF EATING DISORDERS

The Body as a Resource in Recovery

CATHERINE COOK-COTTONE, Foreword by TRACY TYLKA

Cook-Cottone, a licensed psychologist and registered yoga teacher, explores embodiment and its crucial role in treating eating disorders. Embodiment involves being with and working with all of the sensations, emotions, and experiences life offers. Disordered eating is disordered embodiment, but, with the positive embodiment practices explained and demonstrated in this book, the body can become a resource for recovery.

8 KEYS TO END EMOTIONAL EATING

HOWARD S. FARKAS, Foreword by BABETTE ROTHSCILD

"Filled with useful tips and compassionate expertise, this book could help anyone to become more conscious around their eating, whether you're experiencing issues or not. For those who suffer most, it could mean the end of emotional eating and painful dieting, and hope for a better relationship to food and life." —*Greater Good Magazine*

Emotional eaters—those who eat in response to feelings rather than hunger—may take charge of every other aspect of their life, but still feel helpless against the emotional barriers keeping them from healthy eating. This book provides a detailed plan for overcoming these barriers. By exploring the causes that drive the desire to overeat, Howard Farkas, who has more than two decades of professional and teaching experience in clinical psychology, develops practical skills to manage this desire on a daily basis.

THE REFLECTIVE PARENT

How to Do Less and Relate More with Your Kids

REGINA PALLY

"[A] practical and easy-to-read guide for anyone looking to build stronger relationships with their children . . . [T]hrough reflective and introspective processes backed by research and experience."

—*Somatic Psychotherapy Today*

Pally synthesizes the latest neuroscience research to show that our brain's natural tendencies to empathize, analyze, and connect with others are all we need to be good parents. Each chapter weaves together discussions of specific reflective parenting principles like "Tolerate Uncertainty" and "Repair Ruptures" with engaging explanations of the science that backs them up. Brief "Take Home Lessons" at the end of each chapter and vivid examples of parents and children putting the principles into action make this a highly readable, practical guide for anyone looking to build loving, lasting relationships with their kids.

YOUR RESONANT SELF

Guided Meditations and Exercises to Engage Your Brain's Capacity for Healing

Foreword by BONNIE BADENOCH

"Peyton bridges the gap between neuroscience and daily practice, offering meditations that change the way our brains function, help us integrate past painful experiences, and see ourselves with a newfound tenderness and compassion. **I would recommend this book to anyone seeking to heal pain and find a more enriching life.**" —*Psych Central*

In *Your Resonant Self*, Sarah Peyton helps readers learn how to read the signs of their body and understand how physiology can be signaling to them that something is amiss. With clarity and easy-to-follow exercises, it synthesizes the latest developments in neuroscience, trauma treatment, and the power of empathy into an effective healing method that literally rewires our brain and restores our capacity for self-love, emotional regulation and well-being.

THE MYTH OF CLOSURE

Ambiguous Loss in a Time of Pandemic and Change

PAULINE BOSS

"[Boss] writes beautifully and with great emotion as she tackles one of our most difficult challenges—how to grow through pain and suffering. Boss is a cultural therapist whose work helps us understand ourselves and each other." —**Mary Pipher**, psychologist and author of *Women Rowing North* and *Reviving Ophelia*

"This book is packed with observation and stories, and imbued with understanding, compassion, wisdom and permission to be human. **I unreservedly recommend it to anyone who is not quite knowing where they find themselves after the events of the past two years.**" —*Therapy Today*

"[A]n inspired and much-needed framework for living through the pandemic. . . . **[A] beautiful melding of Boss' 80+ years of personal experience with life and loss with her 40+ years of professional work as a family therapist, professor, clinician, and grief expert.**" —*Coalition News*, a publication of the Minnesota Coalition for Death Education and Support

The COVID-19 pandemic has left many of us haunted by feelings of anxiety, despair, and even anger. Pioneering therapist Pauline Boss identifies these vague feelings of distress as ambiguous loss—what we experience when a loss remains unclear and undefined, and thus lingers indefinitely. In this book, you will find guidance for coping with this lingering distress, and learn how the pandemic has taught us to tolerate ambiguity, build resilience, and emerge from crises stronger than we were before.

PAULINE BOSS, PhD, is emeritus professor at University of Minnesota. She is known worldwide for developing the theory of ambiguous loss and as a pioneer in the interdisciplinary study of family stress. Pauline is also the author of *Loss, Trauma, and Resilience* (page 36).

THE WOMEN'S GUIDE TO OVERCOMING INSOMNIA

Get a Good Night's Sleep Without Relying on Medication

SHELBY HARRIS

"Easy to read, comprehensive, and full of useful information, this book gives helpful advice on practical lifestyle changes and sleep-specific techniques. Often used by sleep specialists, techniques such as sleep restriction therapy, stimulus control, cognitive therapy, and mindfulness can easily be performed by the patient. **This is a book that every woman should read to understand good sleep practices, not only those with sleep difficulties.**" —Michael Thorpy, MD, Director, Sleep-Wake Disorders Center, Montefiore Medical Center

More than 60 percent of American women have trouble sleeping. But addressing this issue is more nuanced for women than for men; pregnancy and menopause are just two factors that add complexity to an already difficult problem. At the risk of jeopardizing work, parenting, relationships, or overall health, no woman can afford to deal with sleep deprivation on her own. This roadmap is for those who experience anything from occasional restless nights to chronic insomnia. It outlines several methods to overcome these issues and improve physical and emotional well-being.

BIOFEEDBACK AND MINDFULNESS IN EVERYDAY LIFE

Practical Solutions for Improving Your Health and Performance

INNA KHAZAN

"The concepts offered in this text have changed the way I approach my practice and opened new ways of understanding the body in relation to emotion." —Milton H. Erickson Foundation Newsletter

"This book is simply brilliant! Inna Khazan is the world's leading expert on mindfulness and biofeedback. She combines these fields in a remarkably clear and insightful manner, grounding all she writes in solid science and clinical wisdom. . . . Highly recommended!" —Christopher Germer, PhD, Lecturer on Psychiatry, Harvard Medical School

Biofeedback is the process of training your body to control its involuntary actions, such as breathing and heart rate. Minor changes to these actions can significantly improve physical and emotional well-being. In *Biofeedback and Mindfulness in Everyday Life*, Harvard Medical School faculty member Inna Khazan pairs biofeedback techniques with mindfulness practice to address some of life's most common ailments—from anxiety and fear to stress and insomnia. Khazan's approach outlines simple solutions for readers who want to improve the way they respond to challenges.

NAVIGATING AUTISM

9 Mindsets for Helping Kids on the Spectrum

TEMPLE GRANDIN and DEBRA MOORE

BESTSELLER

"From assessment that considers social-emotional, sensory, motor, medical conditions, and psychiatric co-morbidities, to intervention that draws on a strength-based approach, **this is an invaluable book for optimizing interventions to help clients feel and function at their best.**" —Lindsey Biel, Occupational Therapist and Author of *Sensory Processing Challenges: Effective Clinical Work with Kids & Teens*

International best-selling writer and autistic Temple Grandin joins psychologist Debra Moore in presenting nine strengths-based mindsets necessary to successfully work with young people on the autism spectrum. Examples and stories bring the approaches to life, and detailed suggestions and checklists help readers put them to practical use. Grandin shares her own personal experiences and anecdotes from parents and professionals who have sought her advice, while Debra Moore draws on more than three decades of work as a psychologist with kids on the spectrum and their families.

TEMPLE GRANDIN, PhD, is a professor of animal science at Colorado State University. She has autism and is author of the best-selling *Thinking in Pictures*. **DEBRA MOORE, PhD**, is a psychologist and the coauthor of *The Loving Push*. She was the Founder and Director of Fall Creek Counseling Associates, a practice that served the greater Sacramento area and was an approved teaching site for psychologists in training.

SENSORY PROCESSING CHALLENGES

Effective Clinical Work with Kids & Teens

LINDSEY BIEL

"*Sensory Processing Challenges* clearly explains the often unrecognized connection between many behavior problems and sensitivity to sensory stimuli that the child simply cannot tolerate. When I was a child, some fabrics felt like sandpaper scraping against my skin and sudden loud noises hurt so much they made me scream. I know firsthand how distracting, disruptive, and painful sensory issues can be. Lindsey Biel provides loads of much-needed practical advice to help children with sensory challenges."

HOW TO TALK TO PARENTS ABOUT AUTISM

ROY Q. SANDERS

"[D]elightful book. . . . Although the book is written for therapists, parents of children with autism spectrum disorders might want to read this book themselves. . . . It provides therapists with guidelines of what they should be discussing with parents, and when." —*Bulletin of the Menninger Clinic*

"[A] most unique and valuable book. . . . While books about the subject matter of autism are common, practical advice on the role of the professional as advisor, with its demands, is much harder to find. . . . Professionals and parents will benefit from [Sanders'] expertise." —*Journal of Canadian Academy of Child and Adolescent Psychiatry*

THE HEART AND MIND OF HYPNOTHERAPY

Inviting Connection, Inventing Change

DOUGLAS FLEMONS, Foreword by
MICHAEL D. YAPKO

In his characteristically casual and concise way, Flemons explains and illustrates how hypnosis, like meditation, is invited, not induced. The therapist gets in sync with clients so they can, together, extemporaneously facilitate changes to undesired thoughts, urges, emotions, sensations, or behaviors. This book takes you to the heart of hypnotherapy, to the respectful, playful practice of utilizing clients' flow experience to collaboratively discover and create opportunities for embodied learning and therapeutic change.

PROCESS-ORIENTED HYPNOSIS

Focusing on the Forest, Not the Trees

MICHAEL D. YAPKO, Foreword by
JEFFREY K. ZEIG

Winner of the Society for Clinical and Experimental Hypnosis (SCEH) Arthur Shapiro Award for Best Book on Hypnosis

Internationally recognized psychologist Michael D. Yapko provides clinicians with a new framework for utilizing hypnosis with clients. Yapko encourages clinicians to take a broader perspective, in which patterns rather than individual symptoms are the emphasis of therapy. He offers highly practical information and specific examples for integrating this innovative perspective into clinical work, along with ten richly structured hypnosis session transcripts for clinicians to insightfully adapt to their clients' needs.

MINDFULNESS AND HYPNOSIS

The Power of Suggestion to Transform Experience

MICHAEL D. YAPKO

Winner of the Society for Clinical and Experimental Hypnosis (SCEH) Arthur Shapiro Award for Best Book on Hypnosis

Drawing from real-life case examples, Yapko investigates the role of focused attention in empowering clients to transform their sensory awareness and physiological and emotional states, as well as their reactions to their life experiences. He lays out guidelines for bringing hypnotic suggestions into therapy, and explains how guided mindfulness meditation and hypnosis provide a structured means for extending key insights and skills across different contexts, ranging from relationships to breathing to emotional self-regulation.

1001 SOLUTION-FOCUSED QUESTIONS*Handbook for Solution-Focused Interviewing*

FREDRIKE BANNINK

Drawing on nearly 30 years of clinical practice, Bannink compiles solution-focused questions and protocols that are formulated to elicit the client's expertise on the issue(s) that brought him or her to therapy. Categorized for general use and for use with specific types of clients—such as children, couples, and families, and those who have suffered trauma or who might benefit from medication—the questions demonstrate how the precise use of language is an important tool in solution-focused interviewing.

LAST CHANCE COUPLE THERAPY

Bringing Relationships Back from the Brink

PETER FRAENKEL

In this book, award-winning, internationally renowned couple therapist Peter Fraenkel provides a detailed guide to forming a therapeutic alliance with couples, engaging them in therapy without making them feel trapped in an unhappy future. This therapeutic relationship forms the basis for “experiment in possibility”—activities designed to help partners experience each other in ways that evade their accustomed destructive interactions, negative beliefs, and emotions. Drawing integratively from the wide range of couple therapy theories and practices, and firmly based on the science of couple interaction and empirically supported techniques, Fraenkel describes an effective approach for couples on the brink.

THE STOP DOMESTIC VIOLENCE PROGRAM, 4th Edition

Group Leader's Manual

DAVID B. WEXLER

The bold interventions from STOP have now been field-tested for more than thirty years among military and civilian populations—and STOP has now treated more than 50,000 domestic violence offenders. David Wexler's program offers therapists, social workers, and other counselors a new level of sound, psychology-based interventions that reach the very men who often seem so unapproachable in a treatment setting. This new edition integrates twenty-four field-tested video clips to dramatically illustrate key issues for the group. Presented in a 26- or 52-week psychoeducational format, STOP is packed with updated skills, exercises, videos, handouts, and homework assignments that challenge men to examine themselves and develop new tools to manage their relationship issues.

ATTACHMENT-FOCUSED FAMILY THERAPY WORKBOOK

DANIEL A. HUGHES

"I would highly recommend this book for all clinicians and trainees working with children and youth. . . . it has enabled me to have breakthroughs with families in situations where I have previously been stuck and struggling."

—*Journal of the Canadian Academy of Child & Adolescent Psychiatry*

A practical workbook companion to *Attachment-Focused Family Therapy*—the best-selling text that brought attachment into the realm of family therapy—this book arms therapists with the training exercises, core skills, and interventions to apply the AFFT treatment model effectively.

ISBN: 978-0-393-70649-9 • 2011 • 256 pgs • PB • \$29.95

ATTACHMENT-FOCUSED FAMILY THERAPY

DANIEL A. HUGHES

"[A] book that will change how family therapy is practiced. . . . Whether you work with families, or individuals young or not-so-young, your work will not be quite the same after reading this book. I know mine won't." —Diana Fosha, PhD, Director of the AEDP Institute in New York City

Drawing on more than 20 years of clinical experience, Hughes presents his comprehensive, effective, and accessible treatment model for working with all members of a family to recognize, resolve, and heal personal and family problems using principles from theories of attachment and intersubjectivity.

MAPS OF NARRATIVE PRACTICE

MICHAEL WHITE

Provides practical and accessible accounts of the major areas of narrative practice that White developed and taught over the years. The book covers each of the five main areas of narrative practice—reauthoring conversations, remembering conversations, scaffolding conversations, definitional ceremony, externalizing conversations, and rite of passage maps—to provide readers with an explanation of the practical implications of these conversations for therapeutic growth. The book is filled with transcripts and commentary, skills training exercises for the reader, and charts that outline the conversations in diagrammatic form.

NARRATIVE MEANS TO THERAPEUTIC ENDS

MICHAEL WHITE and
DAVID EPSTON

“The best workshops are those where clinicians can show you new and creative ways of working with clients and also tell you how they have come up with those ideas. . . . Reading this book is like having such a workshop in your living room.” —*Journal of Marital and Family Therapy*

Both authors share delightful examples of a storied therapy that privileges a person’s lived experience, inviting a reflexive posture and encouraging a sense of authorship and reauthorship of one’s experiences and relationships in the telling and retelling of one’s story.

RETELLING THE STORIES OF OUR LIVES

Everyday Narrative Therapy to Draw Inspiration and Transform Experience

DAVID DENBOROUGH

“I have yet to read a text on narrative therapy that so effectively makes itself accessible to both facilitators and service users. Consumers, new and seasoned therapists, and reading and learning groups should all find rich learnings.”

—*Narrative Therapy Centre of Toronto e-newsletter*

Written in collaboration with the Dulwich Centre, the birthplace of narrative therapy, this book gives therapy clients and self-help readers the means to transform their lives through storytelling and writing. Part 1 introduces the key ideas of narrative practice like the Charter of Storytelling Rights and the concept of “remembering” one’s life, presenting a wealth of clinical examples and exercises to demonstrate how these ideas have helped people overcome intense hardship. Part 2 describes, in depth, the conceptual underpinnings of narrative therapy, outlining practical strategies for reclaiming and celebrating one’s experience in the face of trauma, personal failure, grief, and aging.

NARRATIVE THERAPY IN WONDERLAND

Connecting with Children’s Imaginative Know-How

DAVID MARSTEN, DAVID EPSTON,
and LAURIE MARKHAM

“This is a book packed with expertise, wisdom, and interventions. . . . It gives a real sense of being written by therapists for therapists.” —*BACP Children & Young People*

This is a guide to recognizing and connecting with the power of children’s voices and imagination in narrative therapy. By providing imagination-focused approaches to therapeutic terms and concepts, therapists are able to connect with their young clients’ robust imaginations in the healing process. Narrative therapy experts David Marsten, David Epston, and Laurie Markham provide readers with proven methods to help children draw on the potential of their own wonderment, be the protagonists in their own stories, and open new paths to healing and growth.

TRAUMA-SENSITIVE MINDFULNESS

Practices for Safe and Transformative Healing

DAVID A. TRELEAVEN, Foreword by WILLOUGHY BRITTON

"Treleaven has carried out both academic research and clinical investigations over decades into how to make mindfulness safe for trauma survivors, and this is the fruit of his work...This as an informative and readable book, which is evidence based, full of scholarly research as well as lively illustrative case stories and important, practical therapeutic wisdom." —*Human Givens Journal*

"As soon as I finished reading this book, I began suggesting it to friends who are counselors as well as yoga teachers. . . . This book is an exceptional resource for therapists that includes case examples which offer an excellent overview of trauma and its effects. . . . I am grateful for the work that Treleaven is doing and that he has shared this insightful, caring, and valuable book." —*Psych Central*

While mindfulness and meditation can be very effective tools for healing, these tools can also provide situations that unwittingly encourage trauma sufferers to dissociate and retraumatize themselves. This book provides a review of the reasons why meditative practice can be harmful and offers solutions to this conundrum.

Topics include: Introduction: The Need for Trauma-Sensitive Mindfulness • Foundations of Trauma-Sensitive Mindfulness • The Ubiquity of Trauma: Visible and Invisible Forms • Meeting the Moment: Mindfulness and Traumatic Stress • Shaped by the Past: A Brief History of Mindfulness and Trauma • The Brain and Body in Trauma and Mindfulness Part II: The Five Principles of Trauma-Sensitive Mindfulness • Keep the Body in Mind: Working with Dissociation • Practice in Relationship: Supporting Safety and Stability in Survivors

NON-DRUG TREATMENTS FOR ADHD*New Options for Kids, Adults, and Clinicians*

RICHARD P. BROWN and PATRICIA L. GERBARG

"This book is a treasure for both healthcare professionals and the general public. The easily-read text provides a careful review of the research investigating complementary and alternative treatments for ADHD. More importantly, the authors share their wealth of clinical experience in the diagnosis and treatment of this common and disabling disorder." —Philip R. Muskin, MD, Professor of Clinical Psychiatry & Chief of Service, Consultation-Liaison Psychiatry, Columbia University Medical Center

The prolific use of stimulants to treat ADD/ADHD is a controversial topic in therapy. This handbook—for practitioners and parents alike—guides readers through an array of safe and effective alternatives: herbs, vitamins, nutrients, nootropics, neurotherapy, meditation, and more. Filled with case vignettes and interviews with leaders in alternative therapy fields, this accessible, practical guide is one both clinicians and parents won't want to be without.

HEALING CHILD AND FAMILY TRAUMA THROUGH EXPRESSIVE AND PLAY THERAPIES

Art, Nature, Storytelling, Body, Mindfulness

JANET A. COURTNEY

Leaning on our ancestral wisdom of healing through play, art, nature, storytelling, body, touch, imagination, and mindfulness practice, Janet Courtney helps the clinician bring a variety of practices into the therapy room. This book identifies seven stages of therapy that provide a framework for working with client's emotional, cognitive, somatic, and sensory experiences to heal from trauma. Practice exercises interspersed throughout guide practitioners to personally engage in the creative expressive and play therapy techniques presented in each chapter, augmenting professional self-awareness and skill-building competencies.

TRANS KIDS AND TEENS

Pride, Joy, and Families in Transition

ELIJAH C. NEALY

"[A] critical volume for anyone involved with schools or working or volunteering with children and teens. . . . Nealy powerfully makes the case for what can be done to ease the pain of these children. **A must-read for anyone who wants to help trans youth.**" —Booklist, starred review

"Here's the book that caregivers and family members of transgender children have been waiting for. With equal measures sound scientific reasoning and genuine human compassion, Elijah Nealy provides a thoughtful roadmap for anyone trying to support our precious—and endangered—trans youth. An invaluable resource." —Jennifer Finney Boylan, author of *She's Not There* and *Long Black Veil*

Transgender life has made its way into mainstream consciousness and kids are coming out as trans at younger and younger ages. Elijah Nealy (1958-2021)—a therapist, pastor, former deputy director of NYC's LGBT Community Center, and himself a trans man—covers all aspects of family, school, and mental health issues, as well as physical, social, and emotional transitions. This edition contains a new preface by the author detailing the latest information on the physical, social, and emotional aspects of transition.

HOW TO BE A BETTER CHILD THERAPIST

An Integrative Model for Therapeutic Change

KENNETH BARISH

"Ken Barish has once more demonstrated the quintessence of the evidence-based practitioner. This book should be required reading for every professional working with troubled children. It is wisdom, pure and simple." —Marshal P. Duke, PhD, Charles Howard Candler Professor of Psychology, Senior Faculty Fellow, Emory Center for Ethics, Interdisciplinary Faculty Fellow, Institute for Liberal Arts, Department of Psychology, Emory University

Drawing on several decades of experience working with children and parents, Kenneth Barish presents a comprehensive, multi-faceted approach to therapeutic work with children and families, based on a contemporary understanding of children's emotions and emotional needs. This book offers a wealth of practical recommendations to help child therapists solve the varied issues that come up in daily clinical work.

AGGRESSION IN PLAY THERAPY

A Neurobiological Approach for Integrating Intensity

LISA DION, Foreword by BONNIE BADENOCH

"Dion's approach to this complex and rarely explored subject is comprehensive, the use of uncomplicated language makes the text accessible to many. . . . **An excellent introduction to working therapeutically with aggression in play therapy.** It may also be helpful to signpost to social workers and clinicians doing direct work—particularly for the chapters on the Nervous System and Basics on Regulating." —*British Journal of Play Therapy*

This book offers a way to work with aggressive play that allows children to learn how to integrate the intensity they are experiencing from their thoughts, emotions, and sensations while simultaneously supporting regulation in the therapist's nervous system. These will help therapists understand the neurobiological processes that lead kids to dysregulation and help them facilitate emotional healing in their clients.

Contents: 1. Aggression in the Playroom 2. Exploring a New Perspective: Embracing Aggression 3. Understanding the Nervous System 4. What Regulation Really Means 5. Developing Yourself as the External Regulator 6. The Basics of Regulating 7. The Setup 8. Authentic Expression 9. Setting Boundaries 10. It Is Too Intense: Working with Emotional Flooding 11. Observing Aggressive Play 12. Hyper-Aroused Play 13. Hypo-Aroused Play 14. Supporting Parents During Aggressive Play

Lisa Dion, LPC, RPT-S, is the founder and President of the Play Therapy Institute of Colorado and the creator of "Synergetic Play Therapy," a model of play therapy that bridges the gap between neuroscience and psychology. Lisa is the recipient of the Association for Play Therapy's 2015 Professional Education and Training Award.

GUIDED IMAGERY WORK WITH KIDS

Essential Practices to Help Them Manage Stress, Reduce Anxiety, & Build Self-Esteem

MELLISA DORMOY

Guided imagery has been shown to alleviate a host of common emotional issues in kids, from anxiety and insecurity to stress, anger, and the effects of bullying. Easier to practice than meditation or hypnosis, it allows kids to quickly focus, integrate their thoughts, emotions, and feelings, and practice self-compassion, all without the need for extraordinary discipline or time investment. This short, practical book lays out all the guidelines for using guided imagery in therapy, counseling, and any type of helping work with children. It provides dozens of detailed guided imagery scripts that can immediately be put to use to address a variety of particular emotional challenges.

MENTAL HEALTH FOR THE WHOLE CHILD

Moving Young Clients from Disease & Disorder to Balance & Wellness

SCOTT M. SHANNON, MD

“[P]ragmatic, wise, well-researched, and expertly practiced methods . . . I strongly recommend it to anyone whose family or patients have been touched by mental health issues in children and who seeks a truly compassionate, rational, and holistic approach to their care and healing.” —*Explore: The Journal of Science and Healing*

Grounded in an integrative approach, Shannon shows clinicians how to achieve a broad, full-spectrum understanding of a child's life, from their diet and social skills to their sleep habits, stress level, family dynamics, and more. From here, he offers step-by-step assessment strategies and treatment plans for a host of common childhood mental health issues, emphasizing a range of cognitive, behavioral, nutritional, and parenting interventions.

EXECUTIVE FUNCTION & CHILD DEVELOPMENT

MARCIE YEAGER and DANIEL YEAGER

"Offers hope for children and families who struggle with the challenging difficulties associated with delayed self-regulation." —*Journal of Nervous and Mental Disease*

This invaluable resource is a brain-based approach to helping kids stay focused and achieve. It details effective treatment practices for children with executive function difficulties. Executive functions (EF) involve mental processes such as working memory, response inhibition, shifting focus, cognitive flexibility, self-monitoring, and goal orientation. Poor EF can result in behavioral and attentional problems in school. Marcie and Daniel Yeager's dynamic interventions provide external support in a planned and systematic manner, allowing children to compensate for difficulties and grow in their ability to intentionally regulate their thoughts, emotions, and behavior.

THE SCIENCE OF ADDICTION, Second Edition

From Neurobiology to Treatment

"Dr. Erickson draws upon his decades of experience to clearly define misunderstood and misused terms and to simply explain the neurobiological basis underlying the chronic disease of addiction. At the same time, he offers insight, compassion and hope for those helping and those seeking help for substance use disorders." —

Mark Mishek, President and CEO, Hazelden Betty Ford Foundation

The Science of Addiction explains, in an easy-to-understand way, changes in the terminology and characterization of addiction that are emerging based on new neurobiological research. This updated edition reflects the developments in treatment, philosophy, and policy around addiction made in the decade since its original best-selling publication.

ADDICTIONS AND TRAUMA RECOVERY

Healing the Body, Mind, & Spirit

DUSTY MILLER and LAURIE GUIDRY

The Addictions and Trauma Recovery Integration Model (ATRIUM) presented here provides a blend of psychoeducation, process, and expressive activities, all of which are structured to address key issues linked to the experience of both trauma and addiction. The mind-body-spirit approach offers interventions to address these three dimensions of recovery in an integrated program of healing and empowerment. Each treatment component includes clearly articulated, illustrated explanations and interventions to be used collaboratively by professionals and consumers in groups or individual treatment. Handouts allow consumers to work on coping skills between sessions.

SOLUTIONS STEP BY STEP

A Substance Abuse Treatment Manual

INSOO KIM BERG and
NORMAN H. REUSS

"[A]n excellent reminder of the flexibility of the solutions approach and some very good and clear examples of how it has been used effectively to bring about change." —*DECP Debate*

Stressing solutions rather than pathology, clients' strengths and their strategies for past successes rather than their weaknesses or problems, this team utilizes a solution-building approach by discovering and exploring the ways substance abusers heal themselves. Bursting with case examples, quick tips, and questions "from the field," this is a reader-friendly manual.

LAUREL PARNELL, PhD, is one of the world's leading experts on EMDR. A clinical psychologist, she has trained thousands in EMDR in her international workshops.

REWIRING THE ADDICTED BRAIN WITH EMDR-BASED TREATMENT

"Parnell's work has provided a clinical framework that functions to reprocess traumas that drive addictive behavior and help the individual stop their addictive behaviors by building stronger internal resources. I recommend it highly." —Roy A. Blankenship, M.A., LPC, LMFT, CSAT, CAADC, Chief Executive Officer, HopeQuest Addiction Recovery Center, Woodstock, GA

This book presents a brain-wise, compassionate, resilience-supporting approach to the treatment of addictions. Written not only for EMDR therapists but for substance abuse counselors as well, this book presents user-friendly tools to help support clients in recovery with EMDR-based techniques that can be easily integrated into all levels of addiction treatment. Case material is interwoven throughout the text; also included are chapters presenting in-depth cases which illustrate the techniques. Therapists and substance abuse counselors will find this a useful guide to help them navigate the difficult and complex terrain of addiction treatment.

Topics include: Overview of the Rewiring the Addicted Brain Treatment Model • Getting to the Root of the Problem: Reprocessing Traumas with EMDR • Resource Tapping for Addictions: Activating and Integrating Resilience • The Four Foundational Resources • Resource Tapping Tools for Managing Anxiety • Repairing Developmental Deficits

ISBN: 978-0-393-71423-4 • 2019 • 320 pages • Paperback • \$28.99

ATTACHMENT-FOCUSED EMDR

Foreword by DANIEL J. SIEGEL

"Readers will benefit from Parnell's wisdom, clinical experience, and direct and down-to-earth writing style, as well as the case examples she provides with transcripts from actual sessions. **I highly recommend this book-with its relational focus, it will enrich and deepen the practice of any clinician interested in working more effectively.**" —Diana Fosha, PhD, Developer of AEDP, coeditor of *The Healing Power of Emotion*

This beautifully written and clinically practical book combines attachment theory, one of the most dynamic theoretical areas in psychotherapy today, with EMDR to teach therapists a new way of healing clients with relational trauma and attachment deficits.

POLYVAGAL-INFORMED EMDR

A Neuro-Informed Approach to Healing

REBECCA KASE

Linking two cutting-edge approaches to form a robust healing model.

"Every EMDR trainer, consultant, and practitioner should read Polyvagal-Informed EMDR. This clearly-written book brings somatic and attachment lenses and procedures to every part of the EMDR protocol."

—Robin Shapiro, EMDRIA approved consultant, trainer, and practitioner

Polyvagal Theory and EMDR are two well-respected theoretical and practical models with immense implications for therapeutic practice. Polyvagal-Informed EMDR outlines a comprehensive approach for integrating Polyvagal Theory into EMDR Therapy. Individually, each model offers powerful pathways to healing. Combined, these models supercharge therapy and the recovery process.

The integration of Polyvagal Theory within the eight phases of EMDR Therapy offers the psychotherapist a robust, dynamic, neuro-informed framework for case conceptualization, treatment planning, and client transformation. The approach applies not only to work with trauma and PTSD, but also in the treatment of addictions, anxiety, depression, grief, chronic pain, and adjustment disorders.

Rebecca Kase, LCSW, is a licensed clinical social worker in Washington state. She is an EMDR consultant and trainer, who has been practicing EMDR since 2006. She owns Rebecca Kase & CO, Training and Consultation, and has an online counseling practice.

EMDR THERAPY AND SOMATIC PSYCHOLOGY

Interventions to Enhance Embodiment in Trauma Treatment

ARIELLE SCHWARTZ and BARB MAIBERGER, Foreword by ROBIN SHAPIRO

"For everyone working with traumatized patients with issues ranging from frank PTSD to attachment disorders in personality presentations, anxiety, relational issues, body-related conditions, this is a valuable manual, more than just a book." —*Metapsychology*

EMDR therapists must meet the growing demand for an integration of somatic psychology interventions into the eight-phase treatment model. This book offers an integrative model of treatment that teaches therapists how to increase the client's capacity to sense and feel the body, work through traumatic memories in a safe and regulated manner, and facilitate lasting integration.

LIGHT IN THE HEART OF DARKNESS

EMDR and the Treatment of War and Terrorism Survivors

STEVEN M. SILVER and SUSAN ROGERS, Forewords by FRANCINE SHAPIRO and HOWARD LIPKE

Focusing on the application of EMDR to survivors' traumatic experiences, this book covers a wide range of subject matter including school violence, 'near-war' experiences, refugees, combat soldiers, children, and emergency service workers. The book also includes extensive case histories as well as a 'consumer's report' from a war medic whose chronic PTSD was successfully treated with EMDR.

ISBN: 978-0-393-70366-5 • 2001 • 240 pages • Hardcover • \$32.00

EMDR CASEBOOK

A Casebook of Innovative Applications

PHILIP MANFIELD, Editor

The broad range of EMDR is explored via case examples addressing complex emotional problems such as postpartum depression, survivor guilt, and the effects of child abuse. A new chapter on PTSD, written in the wake of September 11, is featured in this paperback edition of Manfield's acclaimed work.

ISBN: 978-0-393-70416-7 • 2003 • 364 pages • Paperback • **POD** • \$35.00

ENERGY PSYCHOLOGY AND EMDR

Combining Forces for Increased Treatment Efficacy

JOHN G. HARTUNG and MICHAEL D. GALVIN

Using case studies from their clinical practices, the authors demonstrate how EMDR and EP in combination can be used with greater impact to meet various therapy challenges: transference and countertransference, severe trauma, abreactions, dissociation, dilemmas, looping and blocking, so-called client resistance, and the problem of maintaining treatment effects.

ISBN: 978-0-393-70378-8 • 2002 • 336 pages • Hardcover • \$40.00

FINDING THE ENERGY TO HEAL

How EMDR, Hypnosis, TFT, Imagery, and Body-Focused Therapy Can Help Restore Mindbody Health

MAGGIE PHILLIPS

In the first four sections, vivid, intriguing stories illustrate how EMDR, hypnosis, imagery, TFT, and body-focused therapy can be used to solve the mysteries of health crises triggered by general stresses and anxiety, posttraumatic stress, and the challenges of organic conditions such as cancer, head injury, arthritis, and cardiac disease. The final section presents three creative models for combining and integrating energy therapies to increase healing possibilities for individuals with complex health situations that do not respond to any one approach.
